JOURNAL OF AEROSOL SCIENCE

In association with the Gesellschaft für Aerosolforschung (GAeF)
Association for Aerosol Research

Founding Editor Prof. C. N. DAVIES (from 1970 to 1984)

Aims and Scope

The *Journal of Aerosol Science* is a long-established international publication which sets out to encourage and foster all aspects of basic and applied aerosol research by publishing high quality scientific papers in that very multidisciplinary field. The submission of original papers is encouraged, describing recent theoretical and experimental research relating to:

—the basic physical and chemical properties of particles in aerosol systems of all types
—their measurement
—their formation, transport and deposition
—their industrial, medical and environmental effects and applications.

Occasional reviews of broader interest may also be considered. The aim in all published articles is to present results in a form which can be generalized as far as possible.

EDITORS-IN-CHIEF

Dr G. KASPER
American Air Liquide, Inc.,
5230 S. East Avenue,
Countryside, IL 60525, U.S.A.

Dr J. H. VINCENT
Box 197 UMHC, University of Minnesota,
420 Delaware Street S.E., Minneapolis,
MN 55455, U.S.A.

EDITORIAL BOARD

K. R. AKSELSSON, Department of the Working Environment, Lund University Institute of Science and Technology, Box 118, S-22100, Lund, Sweden.

SUBJECT INDEX

ABSTRACTS
GAeF 7th Annual conference, Düsseldorf (1979) **11** 231-269
GAeF 8th Annual conference, Schmallenberg (1980) **12** 157-237
GAeF 9th Annual conference, Duisburg (1981) **13** 153-229
GAeF 10th Annual conference, Bologna (1982) **14** 179-460
GAeF 11th Annual conference, Munich (1983) **15** 193-441
GAeF 13th Annual conference, Garmisch-Partenkirchen (1985) **17** 229-652
GAeF 15th Annual conference, Hannover (1987) **18** 589-951
GAef 16th Annual conference, Lund, Sweden (1988) **19** 775-1470
GAef 17th Annual conference, Vienna, Austria (1989) **20** 849-1624

ACETYL
Dispersity effects on the ice nucleating activity of copper acetyl acetonate **11** 495

ACETONATE
Dispersity effects on the ice nucleating activity of copper acetyl acetonate **11** 495

ACID
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere **12** 517
Investigation of the reaction between single aerosol acid droplets and ammonia gas **15** 661
Measurement of the condensational growth of single hygroscopic acid aerosol droplets **12** 551
Re-examination of atmospheric sulfuric acid aerosol formation and growth **11** 411

ACOUSTICS
Acoustically based aerosol particle sizing technique **12** 255

AERODYNAMIC
Aerodynamic particle size measurement by laser-Doppler velocimetry **11** 139
Aerodynamic properties of elongated particles of cromoglycic acid **20** 157
An aerodynamic particle size analyser tested with spheres compact particles and fibres having a common settling rate under gravity **15** 491
Anomalous effects in filter penetration measurements using the aerodynamic particle sizer (APS 3300) **20** 13
Dilution of cigarette smoke for real time aerodynamic sizing with a SPART analyzer **13** 103
Large particle nitrate artifacts in the aerodynamic size distributions of ambient aerosols **20** 667
Selected inorganic chemical composition of mainstream cigarette smoke as a function of aerodynamic particle size **13** 459
The aerodynamic behaviour of cylindrical and spheroidal particles when settling under gravity **17** 53
Use of an aerodynamic particle sizer as a real-time monitor in generation of ideal solid aerosols **17** 963

AEROSOLS
A continental well-aged aerosol in the Guinean savannah at the level of a trough along the ITCZ **16** 19
Accurate measurements of aerosol size distribution-I. Theory of a plate condenser for bipolar mobility analysis **11** 189
Aerosol testing techniques for size-selective samplers **14** 713
Aerosol generation by spark discharge - Technical Note **19** 639
Aerosol recovery following breathholding derived from the distribution of chordlengths in pulmonary tissue **20** 267
Aerosol growth by condensation in a well-mixed chamber **20** 279
Algebraical model for the deposition of aerosols in the human respiratory tract during steady breathing - Addendum **11** 213
Anisokinetic sampling of aerosols at a slot intake **11** 483

Applications of closely graded powders of fused alumina as test dusts for aerosol studies 16 125
Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction 13 59
Aspiration below wind velocity of aerosols with sharp edged nozzles facing the wind 11 535
Atmospheric aerosols and global climate 11 577
Automatic instrument for aerosol samples using the beta-particle attenuation 20 19
Background levels of the summer tropospheric aerosol and trace gases in Greenland 11 95
Bipolar diffusion charging of aerosol particles - I. Experimental results within the diameter range 4-30 nm 14 671
Bipolar diffusion charging of fibrous aerosol particles-I. Charging theory 15 89
Bipolar diffusion charging of fibrous aerosol particles-II. Charge and electrical mobility measurements on linear chain aggregates 15 103
Blockage of porous structures caused by the deposition of aerosol particles 15 503
Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Calibration and design of diffusion batteries for ultrafine aerosols 15 133
Charge transfer to metal surfaces from bouncing aerosol particles 11 115
Charge distribution of ultrafine aerosols undergoing bipolar charging 13 127
Coagulation and deposition of aerosol particles in a flow type chamber 11 11
Coastal aerosol measurements 11 281
Condensation aerosol generator system for monodisperse aerosols of different physicochemical properties 13 363
Continuum field-diffusion theory for bipolar charging of aerosols 14 541
Deposition from charged aerosol flows through a two-dimensional bend 11 391
Deposition from charged aerosol flows through a pipe bend 11 397
Deposition of aerosol particles in a straight tube with an abrupt obstruction 15 167
Development of a system for the exposure of mice to aerosols of plutonium oxide 11 467
Design and characteristics of a portable breath actuated, particle size selective medical aerosol inhaler 13 1
Diffusion collection efficiency of fibers for aerosol over a wide range of Reynolds numbers 13 403
Diffusion of aerosols from a stream flowing through a short cylindrical pipe 15 637
Evaluation of aerosol aspiration efficiency as a function of Stokes number, velocity ratio and nozzle angle 11 179
Evaporation of sodium and the formation of aerosols 14 163
Experimental investigation of dendritic deposition of aerosol particles (Comments) 11 567, 571
Experimental studies of ion clustering: relationship to aerosol formation processes and some atmospheric implications 13 73
Filtration of aerosols 14 147
First measurements of aerosol particle charging by free electrons - a preliminary report 14 5 (1983)
Formation of ultrafine ion H_2O-H_2SO_4 aerosol particles through ion-induced nucleation process in the stratosphere 11 35
General field charging theory for aerosol particle charging and neutralizing in unipolar and bipolar ion fields 14 127
Generation and characterization of aerosols of dispersed surface active phospholipids by ultrasonic and jet nebulization 14 683
Generation of monodisperse Ag- and NaCl-aerosols with particle diameters between 2 and 300 nm 14 113
High-resolution electrical mobility aerosol spectrometer (MAS) 14 589
Human respiratory tract deposition using multimodal aerosols 13 337
Ice crystal formation on aerosol particles with a non-uniform surface 13 21
Intercomparison of different "absolute" instruments for measurement of aerosol number concentration 13 429
Inversion to obtain aerosol size distributions from measurements with a differential mobility analyzer 13 513
Light scattering by aerosols with layered humidity-dependent structure 11 367
Measurements of growth due to condensation for some common aerosols 20 289
Note on the deposition of aerosol particles in a channel due to diffusion and electric charge 11 517
Operation of the electrical aerosol analyzer at reduced pressures 11 427
Optical investigation of high-speed aerosol-microjets 13 471
Optical diameters of aggregate aerosols 15 615
Particle number distributions of aerosols from test fires 11 439
Preparation of uniform colloidal dispersions by chemical reactions in aerosols-2. Spherical particles of aluminium hydrous oxide 11 271
Re-examination of atmospheric sulfuric acid aerosol formation and growth 11 411
Removal of aerosol particles from stationary air within porous media 16 175
Response of a quartz crystal aerosol mass monitor to sulfate and nitrate aerosols 14 633
Results of improved size distribution measurements in the Aitken range of atmospheric aerosols 11 321
Radiolytic condensation nuclei in aerosol neutralizers 14 23

Sampling efficiency of aerosol samplers for large wind-borne particles - a preliminary report 14 65
Stable, high-concentration, dry aerosol generator 13 499
Study of the attachment of thoron decay products to aerosols using an aerosol centrifuge 11 87
Studies of silver iodide ice-forming acitivity-II. Influence of aerosol particle size and structure on the ice-forming activity 11 61
Technique for calculation of aerosol particle size distributions from indirect measurements 11 359
Thermal diffusion of aerosol particles: Lagrangian autocorrelation as an alternative to Langevin's equation 13 597
Thermophoresis of aerosol particles at small Knudsen numbers: theory and experiment 13 327
Time dependent gravitational sedimentation of aerosol particles from steady laminar flows in channels and ducts 11 161
Total and regional deposition of inhaled aerosols in humans 14 599
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence 13 321
Unipolar and bipolar diffusion charging of ultrafine aerosol particles 16 109

AGGLOMERATES
New approaches to in situ characterization of ultrafine agglomerates 19 553

AGGREGATES
Bipolar diffusion charging of fibrous aerosol particles - II. Charge and electrical mobility measurements on linear chain aggregates 15 103
Deposition of 0.1 μm chain aggregate aerosols in beagle dogs 12 119
Dynamic shape factors: measurement techniques and results on aggregates of solid primaries 11 67
Dynamic shape factors of sphere aggregates in an electric field and their dependence on the Knudsen number 16 69
Image enhancement of aggregate aerosols by stereopsis 16 211
Optical diameters of aggregate aerosols 15 615
Slip correction measurements for aerosol particles of doublet and triangular triplet aggregates of spheres 16 57
Theoretical equilibrium bipolar charge distributions of chain aggregates with uniform spheres; 14 489

AIR
Mass spectra of negative ions in air-like gas mixtures at atmospheric pressure 11 475
Characteristics of ice-forming nuclei in continental-maritime air 15 147
Removal of aerosol particles from stationary air within porous media 16 175
The mean free path in air 19 159

AIRBORNE
Effect of radial diffusion on penetration of airborne particles through a radial-flow sampler 12 457
Entrance of airborne particles into a blunt sampling head 12 541
Rotational electrodynamics of airborne fibers 16 315
The interdependence of evaporation and settling for airborne freely falling droplets 20 749

AIRFLOW
A many-fibre model of airflow through a fibrous filter 15 583
A many-fibre theory of airflow through a fibrous filter-II: fluid inertia and fibre proximity 17 685

AIRWAYS
Effect of the laryngeal jet on particle deposition in the human trachea and upper bronchial airways 11 447
Growth of sulphate aerosols in the human airways 13 9
Inertial and interceptional deposition of spherical particles and fibers in a bifurcating airway 19 679
Precipitation of charged particles in human airways 12 131
Quantitative evaluation of aerosol deposition in constricted tubes 16 167

AITKEN
Etude des sources et caracteristiques physiques des noyaux d'Aitken à Brazzaville-Congo 13 391
On the physics of Aitken particles in polar air mass systems 17 73

Resultes of improved size distribution measurements in the Aitken range of atmospheric aerosols 11 321
University of Missouri-Rolla, absolute Aitken nucleus counter 13 373

ALASKA
Nuclei production in Alaska air masses under the action of short wave (1850 Å) ultraviolet irradiation 14 475

ALGEBRAICAL
Algebraical model for the deposition of aerosols in the human respiratory tract during steady breathing - Addendum 11 213

ALPHA
The interpretation of alpha energy spectra from particulate sources 15 533

ALUMINOSILICATE
Production of monodisperse, radioactively labelled aluminosilicate glass particles using a spinning top 11 557

ALUMINUM
Preparation of uniform colloidal dispersions by chemical reactions in aerosols - 2. Spherical particles of aluminum hydrous oxide 11 271

AMMONIA
Investigation of the reaction between single aerosol acid droplets and ammonia gas 15 661
Measurement of particulate and gaseous ammonia at a suburban area by means of diffusion tubes (denuders) 15 465
Onset of particle crystallization resulting from acid droplet ammonia gas reactions 18 23

AMMONIUM
Determination of the density and morphology of sub- micron ammonium chloride particles 11 77
Effect of temperature on the structure and density of ammonium chloride particles 12 467
Measurement of the water cycle in a levitated ammonium sulfate particle 15 563

ANALYSIS
Accurate measurements of aerosol size distribution - I. Theory of a plate condenser for bipolar mobility analysis 11 189.
Analysis of various nucleation mechanisms for sulfate particles in the stratosphere 13 561
An automated tape-collection system for precise aerosol analysis 16 269
Fibre size characterization and size analysis using general and bivariate log-normal distributions 16 407
Particles size distribution analysis by scattered light measurements using an optically defined measuring volume 14 765
Particle size analysis of log-normally distributed ultrafine particles using a differential mobility analyser 20 547
Recent advances in aerosol analysis by infrared spectroscopy 20 441
Surface and bulk chemical analysis on metal aerosols generated by manual metal arc welding of stainless steel 17 1
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence 13 321
Radioactivity analysis and compressible flow capillary system 15 123

ANALYZERS
Accurate measurements of aerosol size distribution - II. Construction of a new plate condenser electric mobility analyzer and first results 11 201
An aerodynamic particle size analyser tested with spheres, compact particles and fibres having a common settling rate under gravity 15 491
Calibration of differential mobility analyser by visual method 12 339
Inversion to obtain aerosol size distributions from measurements with a differential mobility analyzer 13 513

New current measuring technique for electrical aerosol analyzers 18 401
Operation of the electrical aerosol analyzer at reduced pressures 11 427
Use of differential mobility analyzers of second order in determining the aerosol size distribution 12 55
Discussion 12 59

ANISOKINETIC
Anisokinetic sampling of aerosols at a slot intake 11 483

ANNULAR
Theoretical and experimental studies for determining the aerosol sampling efficiency of annular slot probes 16 335

ANTARTIC
Seasonal variation in Antarctic aerosol 12 491

ARCTIC
Aerosol variation in the western hemisphere Arctic 15 13

ARGON
Experimental study of argon condensation in cryogenic shock tubes; 14 755

ASBESTOS
Survey of recent measurements with asbestos fibers 18 479

ASH
Redispersion of fly ash from a liquid nitrogen suspension 12 39

ASPIRATION
Aerosol sampling by an annular slot sampler with a smooth aspiration tube entrance 19 725
Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction 13 59
Aspiration below wind velocity of aerosols with sharp edged nozzles facing the wind 11 535
Evaluation of aerosol aspiration efficiency as a function of Stokes number, velocity ratio and nozzle angle 11 179
On the aspiration characteristics of large-diamter, thin-walled aerosol sampling probes at yaw orientations with respect to the wind 17 211
The effects of finite Reynolds number on the aspiration of particles into a bulky sampling head 18 553

ASYMMETRY
Modelling study of regional deposition of inhaled aerosols with special reference to effects of ventilation asymmetry 18 563

ATMOSPHERIC
Atmospheric aerosols and global climate 11 577
Cumulative chemical composition of atmospheric cloud condensation nuclei 15 709
Empirical functions for atmospheric aerosol size distributions 20 351
Etude des caracteristiques du silicium et de l'aluminium atmospherique; 14 747
Etude par spectroscopie de vibration des particules atmospheriques 19 33
Experimental studies of ion clustering: relationship to aerosol formation processes and some atmospheric implications 13 73
Formation of aerosols in irradiated atmospheric air 17 745
Mass spectra of negative ions in air-like gas mixtures at atmospheric pressure 11 475
Measurements of atmospheric turbidity from a network of sun-photometers in Italy during ALPEX 15 595
Particles in the atmosphere: A review 18 469
Penetration of atmospheric aerosols during collection in cellulose filters, studied by secondary ion mass spectrometry 20 569

Re-examination of atmospheric sulfuric acid aerosol formation and growth 11 411
Trace element analysis of filter and impactor sample of atmospheric aerosols by photon induced X-ray fluorescence 13 321

ATOMIZERS
Construction and properties of a simple atomizer 14 679
Droplet spectra measurements of fan and cone atomisers using a laser diffraction technique 12 529

BACKGROUND
Background levels of the summer tropospheric aerosol and trace gases in Greenland 11 95

BACKSCATTER
Influence of refractive index and particles size interval on Mie calculated backscatter and extinction 18 131

BATTERY
Calibration and design of diffusion batteries for ultrafine aerosols 15 133
Effects of diesel particle loading on screen diffusion batteries 15 447
EM algorithm reconstruction of particle size distributions from diffusion battery data 16 557
Extension of the screen type diffusion battery theory 12 385
On the interpretation of diffusion battery data 20 797
Penetration measurements for tube and screen-type diffusion batteries in the ultrafine particle size range 15 673
Theory of a screen-type diffusion battery 11 313 Theory and calibration of a screen-type diffusion battery 11 549

BEAGLE DOGS
Deposition of 0.1 micrometer chain aggregate aerosols in beagle dogs 12 119

BEDS
Electrostatic filtration of inertialess particles by granular beds 12 27
Maximum penetration of aerosol particles in granular bed filters 12 79

BENDS
Deposition from charged aerosol flows through a two-dimensional bend 11 391
Deposition from charged aerosol flows through a pipe bend 11 397

BENZO(a)PYRENE
Generation of benzo(a)pyrene-tagged aerosols 15 183

BERYLLIUM
In Vitro dissolution characteristics of beryllium oxide and beryllium metal aerosols 19 333

BIMODAL
A comparison of parameter estimation procedures for experimental bimodal lognormal particle size distributions and grouped data 18 431

BINARY
Binary homogeneous nucleation theory by cluster- cluster interaction with application to the H_2SO_4-H_2O system 12 61
Binary nucleation of methanesulfonic acid and water 20 585
Experimental studies of the ion-induced binary nucleation 13 285
Formation and growth of binary aerosol in a laminar coaxial jet 19 413
Remarks on particle size distributions of ultrafine binary particles with on involatile component 16 273

BIOAEROSOL
A static particle size selective bioaerosol sampler for the ambient atmosphere **20** 829

BIPOLAR
Accurate measurements of aerosol size distribution - I. Theory of a plate condenser for bipolar mobility analysis **11** 189
Bipolar diffusion charging of aerosol particles - I. Experimental results within the diameter range 4-30 nm; **14** 671
An approximation of the bipolar charge distribution for particles in the submicron size range TECHNICAL NOTE **19** 387
Bipolar diffusion charging of fibrous aerosol particles - I. Charging theory **15** 89
Bipolar diffusion charging of aerosol particles - II. Influence of the concentration ratio of positive and negative ions on the charge distribution **15** 47
Bipolar charging in the transition regime **17** 653
Charge distribution of ultrafine aerosols undergoing bipolar charging **13** 127
Continuum field-diffusion theory for bipolar charging of aerosols **14** 541
General field charging theory for aerosol particle charging and neutralizing in unipolar and bipolar ion fields **14** 127
Theoretical equilibrium bipolar charge distributions of chain aggregates with uniform spheres **14** 489
Unipolar and bipolar diffusion charging of ultrafine aerosol particles **16** 109

BISTATIC
Remote sounding of aerosols in the lower atmosphere using a bistatic CW helium-neon lidar **20** 37

BLACK
An analysis of black aerosol found in two winter atlantic coastal snow storms at whiteface mountain, New York **17** 677

BLACKNESS
A preliminary climatology of aerosol blackness **15** 1

BLUNT
Entrance of airborne particles into a blunt sampling head **12** 541

BOUNCING
Charge transfer to metal surfaces from bouncing aerosol particles **11** 115

BRONCHIAL
Comparison of experimental and calculated data for the total and regional depositions in the human lung **16** 133
Effect of the laryngeal jet on particle deposition in the human trachea and upper bronchial airways **11** 447

BROWNIAN
Brownian diffusion of charged fine particles surrounding a conducting cylinder in the presence of an external electric field **17** 201

CALCULATION
Calculation of the drag on a sphere with an attached dendrite **19** 317
Simple method for the calculation of turbulent deposition to smooth and rough surfaces **12** 275
Technique for calculation of aerosol particle size distributions from indirect measurements **11** 359

CALIBRATION
Calibration of an automatic condensation nuclei counter at the South Pole **11** 305
Calibration of differential mobility analyser by visual method **12** 339
Calibration formulas for the Pollak condensation nucleus counter **13** 121
Calibration of an optical particle counter by particle Doppler shift spectrometry in the 4-8 micrometer range **11** 53

Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Calibration and design of diffusion batteries for ultrafine aerosols 15 133
Calibration studies of the DRUM impactor 19 183
Design and calibration of a low volume fog sampler 19 175
Realisation d'echantillons pour l'étude de la diffusion de la lumière. Application à la calibration des granulométres et densimètres 19 105
Theory and calibration of a screen-type diffusion battery 11 549

CAPTURE
Capture of dust particles in filters by line-dipole charged fibres 12 349

CASCADE (impactors)
An assessment of an Andersen Mark-II cascade impactor 19 213
Personal note on the history of the cascade impactor 13 37
Electrets as a cascade impactor substrate 15 647

CATALYST
Capture of aerosols by operating catalyst-Zark effect 18 43

CELL
Cell model of aerosol collection by fibrous filters in an electrostatic field 12 91

CENTRIFUGE
Study of the attachment of thoron decay products to aerosols using an aerosol centrifuge 11 87

CHAIN
Bipolar diffusion charging of fibrous aerosol particles - II. Charge and electrical mobility measurements on linear chain aggregates 15 103
Deposition of 0.1 micrometer chain aggregate aerosols in beagle dogs 12 119
Measurements of viscous drag on cylinders and chains of spheres with aspect ratios between 2 and 50 16 535
Theoretical equilibrium bipolar charge distributions of chain aggregates with uniform spheres 14 489

CHAMBER
A smog chamber study on the impact of aerosols on the photodegradation of chemicals in the troposphere 18 65
Coagulation and deposition of aerosol particles in a flow type chamber 11 11
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. Homogeneous nucleation of stearic acid 14 697
Deposition of aerosol particles due to simultaneous diffusion and gravitational sedimentation within a spherical chamber - solutions to the Fokker- Planck equations 12 11
Droplet growth and diffusion in a low-pressure cloud chamber 16 145
Segmented thermal diffusion chamber for continuous measurements (Errata) 11 421

CHANNELS
Note on the deposition of aerosol particles in a channel due to diffusion and electric charge 11 517
Time dependent gravitational sedimentation of aerosol particles from steady laminar flows in channels and ducts 11 161

CHARACTERISTICS
Characteristics of ice-forming nuclei in continental-maritime air 15 147
Characterization of aerosol mobility distributions by integral mobility analysis - The method of mobility moments 12 109
Characterization of the particulate emission by a large oil fuel fired power plant 14 557
Etude des caracteristiques du silicium et de l'aluminium atmospherique 14 747
Exposure characterization of aerosols and carbon monoxide from supplemental inflatable restraint (automotive air bag) systems 20 657

Generation and characterization of aerosols of dispersed surface active phospholipids by ultrasonic and jet nebulization 14 683
Pulse interval and pulse width measurements in determining the flow characteristics in the viewing volume of single particle optical counters 13 451
Response characteristics for four different condensation nucleus counters to particles in the 3-50 nm diameter range 16 443

CHARGE

Bipolar diffusion charging of aerosol particles - I. Experimental results within the diameter range 4-30 nm 14 671
Bipolar diffusion charging of fibrous aerosol particles - I. Charging theory 15 89
Bipolar diffusion charging of fibrous aerosol particles - II. Charge and electrical mobility measurements on linear chain aggregates 15 103
Bipolar diffusion charging of aerosol particles - II. Influence of the concentration ratio of positive and negative ions on the charge distribution 15 47
Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Capture of dust particles in filters by line-dipole charged fibres 12 349
Charge distribution of ultrafine aerosols undergoing bipolar charging 13 127
Charge transfer to metal surfaces from bouncing aerosol particles 11 115
Collection of hydrophilic and hydrophobic charged submicron particles by charged water droplets; 14 703
Continuum field-diffusion theory for bipolar charging of aerosols 14 541
Deposition of charged particles near the entrance of a cylindrical tube 11 47
Deposition of charged particles in the human airways 14 643
Deposition from charged aerosol flows through a two-dimensional bend 11 391
Deposition from charged aerosol flows through a pipe bend 11 397
Deposition of charged particles, A note on 12 387
Electrical image deposition of charges from laminar flow in cylinders 11 461
Equilibrium charge distribution on doublets and triplets of uniform 0.500 micrometer diameter polystyrene spheres - an experimental study 11 415
Equilibrium charge distribution of multiplets of monodisperse latex spheres 14 499
First measurements of aerosol particle charging by free electrons - a preliminary report 14 5
General field charging theory for aerosol particle charging and neutralizing in unipolar and bipolar ion fields 14 127
Note on the deposition of aerosol particles in a channel due to diffusion and electric charge 11 517
Particle deposition in the wake of charged spheres 13 491
Precipitation of charged particles in human airways 12 131
Semi-automatic method for the assessment of electric charge carried by airborne dust 14 643
Space-charge effects in aerosol charging and migration 12 307
Theory of diffusion charging of arbitrarily shaped conductive aerosol particles by unipolar ions 12 19

CHEMICAL

A study of the chemical structure of particles in the welding fumes of mild and stainless steel 15 57
Chemical composition of remote area aerosols 12 367
Cumulative chemical composition of atmospheric cloud condensation nuclei 15 709
Physical and chemical properties of the aerosol produced by the electron beam dry scrubbing of flue gas (ES-Verfahren) 17 669
Selected inorganic chemical composition of mainstream cigarette smoke as a function of aerodynamic particle size 13 459

CHLORIDE

Determination of the density and morphology of submicron ammonium chloride particles 11 77
Effect of temperature on the structure and density of ammonium chloride particles 12 467

CIGARETTE

Dilution of cigarette smoke for real time aerodynamic sizing with a SPART analyzer 13 103
Selected inorganic chemical composition of mainstream cigarette smoke as a function of aerodynamic particle size 13 459

CLIMATE

A preliminary climatology of aerosol blackness 15 1
Atmospheric aerosols and global climate 11 577

Photo electric nucleus counters for aerosol climatology 12 477

CLUSTER
Binary homogeneous nucleation theory by cluster-cluster interaction with application to the H_2SO_4-H_2O system 12 61
Effect of particle loading on granular bed filtration - The cluster enhanced filter model 19 425
Effect of particle loading on granular bed filtration - Extension of the CEF model to polydisperse systems 19 443
Optical and dynamical properties of fractal clusters of carbonaceous smoke 20 765

COAGULATION
Coagulation and depositions of aerosol particles in a flow type chamber 11 11
Stochastic modeling of nucleation and coagulation growth processes for NH_4Cl 13 345

COASTAL
An analysis of black aerosol found in two winter atlantic coastal snow storms at whiteface mountain, New York 17 677
Coastal aerosol measurements 11 281

COEFFICIENT
Experimental measurements of the diffusion coefficients and calculated sizes of Pb-212 particles Technical Note 19 767
Measurement of water and ammonia accommodation coefficients at surfaces with adsorbed monolayers of hexadecanol - TECHNICAL NOTE 16 571
Note on the slip coefficient of doublets of spheres 14 753
Review of aspiration coefficients of thin-walled sampling nozzles 17 729

COFERA
Troisiemes Journées d'Étude sur les aerosols - 9 and 10 December 1986, Paris - Porte de Versailles 19 1

COLLOIDAL
Preparation of uniform colloidal dispersions by chemical reactions in aerosols-2. Spherical particles of aluminium hydrous oxide 11 271

COLLECTION
An automated tape-collections system for precise aerosol analysis 16 269
Cell model of aerosol collection by fibrous filters in an electrostatic field 12 91
Collection of hydrophilic and hydrophobic charged submicron particles by charged water droplets 14 703
Diffusion collection efficiency of fibers for aerosol over a wide range of Reynolds numbers 13 403
Experimental observation of collection efficiency of a dust-loaded fiber 15 483
Fibre collection and measurement with the inertial spectrometer 13 49
Note on the approximation of interceptional collection efficiencies 11 335
Numerical determination of electrically enhanced fiber collection efficiency 14 87
Perturbation method for the approximation of the inertial collection efficiency for fibrous filters with electrical enhancement 14 463
Simulation of the growing process of a particle dendrite and evaluation of a single fiber collection efficiency with dust load 11 377

COMBUSTION
Particle charge in combustion aerosols 17 47

CONCENTRATION
A new technique to measure number concentration of submicrometer particles: Theory and experiment 16 477
Extension to the Kyle theory for determining particle concentration by statistics 13 29

Cyclone samplers for measuring the concentration of inhalable particles in process streams 13 259
Intercomparison of different "absolute" instruments for measurement of aerosol number concentration 13 429
Stable, high-concentration, dry aerosol generator 13 499

CONDENSATION
An investigation into the loss of particles by diffusion in the Nolan-Pollak condensation nucleus counter 15 177
Application of a multistep condensation nuclei counter as a detector for particle surface composition 16 201
Calibration of an automatic condensation nuclei counter at the South Pole 11 305
Calibration formulas for the Pollak condensation nucleus counter 13 121
Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Condensation aerosol formation and growth in a laminar coaxial jet: Experimental 17 11
Condensation aerosol generator system for monodisperse aerosols of different physicochemical properties 13 363
Condensation by homogeneous nucleation of H_2O, C_6H_6, CCl_4 and CCl_2F in a shock tube 14 29
Condensational growth of a spherical droplet: free molecular limit 17 723
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. Homogeneous nucleation of stearic acid 14 697
Condensation on a spherical droplet - III 19 287
Continuous flow, single-particle-counting condensation nucleus counter 11 343 (Note, 358)
Cumulative chemical composition of atmospheric cloud condensation nuclei 15 709
Development of a mixing type condensation nucleus counter 13 232
Diffusion tube; a cloud condensation nucleus counter for use below 0.3% supersaturation 13 297
Estimation of supersaturation attained in a condensation nucleus counter 15 553
Evaporation and condensational growth of tiny droplets 11 293
Experimental study of argon condensation in cryogenic shock tubes 14 755
In situ measurement of adsorption and condensation of a polyaromatic hydrocarbon on ultrafine C particles by means of photoemission 17 699
Maximum aerosol densities from evaporation-condensation processes 20 293
Measurement of the condensational growth of single hygroscopic acid aerosol droplets 12 551
Novel condensation nucleus counter for the single measurement determination of Kelvin size spectra 11 403
On the influence of the vapour substance on the behaviour of an expansion-type condensation nucleus counter 16 457
Radiolytic condensation nuclei in aerosol neutralizers 14 23
Supersaturation and expansion ratios in condensation nuclei counters: an historical perspective 13 481
The Nolan-Pollak condensation nucleus counter 16 245

CONDENSER
Accurate measurements of aerosol size distribution - I. Theory of a plate condenser for bipolar mobility analysis 11 189, II. Construction of a new plate condenser electric mobility analyzer and first results 11 201

CONDUCTIVE
Theory of diffusion charging of arbitrarily shaped conductive aerosol particles by unipolar ions 12 19

CONGRATULATIONS
Professor Charles Norman Davies' Seventy-Fifth Birthday 16 89
Professor Harald Straubel's eightieth birthday 17 113
80eme Anniversaire du Professeur Jean Bricard 18 355

CONFERENCE REPORT
Aerosols - Their generation, behaviour and applications 18 461
Comptes-rendus des 4es journées d'études sur les aérosols (COFERA-GAMS) 19 391
Comptes-rendu des 5emes journées d'études sur les aérosols 20 391
Optical particle sizing Theory and practice 19 265
The tenth international conference on condensation and ice nuclei 14 71

CONSTANTS
Direct measurement of the nucleation rate constants 11 23

CONSTRUCTION
Construction and properties of a simple atomizer 14 679

CONE
Droplet spectra measurements of fan and cone atomizers using a laser diffraction technique 12 529

CONTINUUM
Continuum field-diffusion theory for bipolar charging of aerosols; 14 541

COPPER
Dispersity effects on the ice nucleating activity of copper acetyl acetonate 11 495

CORRESPONDENCE
Comparison between theory and experiment in dendritic aerosol deposition. A revision 13 603
Generation and characterization of aerosols of dispersed surface active phospholipids by ultrasonic and jet nebulization 15 519
Pressurized aerosol inhaled through extension devices 14 69, 70

COULOMBIC
Coulombic deposition mechanisms in electret filters 18 29

COUNTERS
An investigation into the loss of particles by diffusion in the Nolan-Pollak condensation nucleus counter 15 177
Application of a multistept condensation nuclei counter as a detector for particle surface composition 16 201
Calibration of an automatic condensation nuclei counter at the South Pole 11 305
Calibration formulas for the Pollak condensation nucleus counter 13 121
Calibration of an optical particle counter by particle Doppler shift spectrometry in the 4-8 micrometer range 11 53
Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Continuous flow, single-particle-counting condensation nucleus counter 11 343 (Note, 358)
Counting efficiencies of six commercial particle counters 17 947
Development of a mixing type condensation nucleus counter 13 231
Diffusion tube; a cloud condensation nucleus counter for use below 0.3% supersaturation 13 297
Experimental studies of the response of an optical counter to dry and liquid particles of different shape and refractive index 12 239
Experimental responses of two optical particle counters 15 457
Note on the use of a photoelectric counter for total particle counting 13 93
Novel condensation nucleus counter for the single measurement determination of Kelvin size spectra 11 403
Photoelectric nucleus counters for aerosol climatology 12 477
Optical particle counters: response, resolution and counting efficiency 13 529
Pulse interval and pulse width measurements in determining the flow characteristics in the viewing volume of single particle optical counters 13 451
Statistics of multiple counting in aerosol counters 15 69
Statistics of multiple counting in aerosol counters-II. Concentration counters 17 87
Supersaturation and expansion ratios in condensation nuclei counters: an historical perspective 13 481
University of Missouri-Rolla, absolute Aitken nucleus counter 13 373

CRYOGENIC
Experimental study of argon condensation in cryogenic shock tubes 14 755

CRYSTAL
Gaseous interference to performance of a quartz crystal aerosol mass monitor 15 473

Ice crystal formation on aerosol particles with a non-uniform surface 13 21

CURRENT WORK
Current work on nucleation 14 173, 573

CYCLONE
Collection of aerosol particles in a cyclone with an external electric field 20 695
Construction and testing of an axial flow cyclone preseparator 19 295
Cyclone samplers for measuring the concentration of inhalable particles in process streams 13 259

CYLINDRICAL (Cylinders)
Deposition of charged particles near the entrance of a cylindrical tube 11 47
Diffusion of aerosols from a stream flowing through a short cylindrical pipe 15 637
Dimensional aspects of aerosol deposition on cylinders with rebound 15 657
Electrical image deposition of charges from laminar flow in cylinders 11 461
Measurements of viscous drag on cylinders and chains of spheres with aspect ratios between 2 and 50 16 535
On the deposition of aerosol particles on cylinders in turbulent cross flow 19 451

DECAY
Study of the attachment of thoron decay products to aerosols using an aerosol centrifuge 11 87

DEMONA
Demona: Etude de comportement d'aérosols dans un confinement 19 65

DENDRITE
Experimental investigation of dendritic deposition of aerosol particles (Comments) 11 567,571
Simulation of the growing process of a particle dendrite and evaluation of a single fiber collection efficiency with dust load 11 377

DENSITY
Determination of the density and morphology of submicron ammonium chloride particles 11 77
Maximum aerosol densities from evaporation-condensation processes 20 293

DEPOSITION
A note comparing the rates of deposition of sub-micron particles with the rates of heat transfer for ribbed surfaces exposed to turbulent gas streams 17 145
Algebraical model for the deposition of aerosols in the human respiratory tract during steady breathing - Addendum 11 213
Blockage of porous structures caused by the deposition of aerosol particles 15 503
Coagulation and deposition of aerosol particles in a flow type chamber 11 11
Comparison between theory and experiment in dendritic aerosol deposition. A revision 12 269; 13 603
Comparison of experimental and calculated data for the total and regional deposition in the human lung 16 133
Correction to the small-time approximation of diffusive deposition from a uniform initial concentration of particles in a circular tube with adsorbing walls 12 15
Deposition from charged aerosol flows through a two-dimensional bend 11 391
Deposition from charged aerosol flows through a pipe bend 11 397
Deposition of 0.1 micrometer chain aggregate aerosols in beagle dogs 12 119
Deposition of aerosol particles due to simultaneous diffusion and gravitational sedimentation within a spherical chamber - solutions to the Fokker- Planck equations 12 11
Deposition of aerosol particles in a straight tube with an abrupt obstruction 15 167
Deposition of charged particles near the entrance of a cylindrical tube 11 47
Deposition of charged particles, A note on 12 387
Deposition of charged particles in the human airways; 16 657
Deposition of particles in the human respiratory tract in the size range 0.005-15 μm 17 811

Diffusional deposition of aerosol in fibrous filters 12 357, Erratum 13 87
Dimensional aspects of aerosol deposition on cylinders with rebound 15 657
Effect of the laryngeal jet on particle deposition in the human trachea and upper bronchial airways 11 447
Electrical image deposition of charges from laminar flow in cylinders 11 461
Experimental investigation of dendritic deposition of aerosol particles (Comments) 11 567,571
Human respiratory tract deposition using multimodal aerosols 13 337
Influence of the expansion humidity on the deposition of particles in impactors 12 49
Measurement of the deposition of small particles in stationary and oscillating turbulent pipe flow 14 615
Measurements of the total and regional deposition of inhaled particles in the human respiratory tract 13 549
Note on the deposition of aerosol particles in a channel due to diffusion and electric charge 11 517
Particle deposition in the wake of charged spheres 13 491
Physical factors determining particle deposition in the human respiratory tract 11 505
Radon daughter and thoron daughter deposition velocity and unattached fraction under laboratory-controlled conditions and in underground uranium mines 16 157
Simple method for the calculation of turbulent deposition to smooth and rough surfaces 12 275
Theory of gravitational deposition of growing particles from laminar tube flow 11 1
Total and regional deposition of inhaled aerosols in humans 14 599
Turbulent deposition and gravitational sedimentation of an aerosol in a vessel of arbitrary shape 12 405
Uniform deposit impactor 12 333

DIESEL

Predicted deposition of diesel particles in young humans 18 419

DIFFERENTIAL

Calibration of differential mobility analyser by visual method 12 339
Use of differential mobility analyzers of second order in determining the aerosol size distribution 12 55
DISCUSSION 12 59

DIFFRACTION

Droplet spectra measurements of fan and cone atomisers using a laser diffraction technique 12 529

DIFFUSION

Bipolar diffusion charging of aerosol particles - I. Experimental results within the diameter range 4-30 nm 14 671
Bipolar diffusion charging of fibrous aerosol particles - I. Charging theory 15 89
Bipolar diffusion charging of aerosol particles-II. Influence of the concentration ratio of positive and negative ions on the charge distribution 15 47
Calibration and design of diffusion batteries for ultrafine aerosols 15 133
Comparison of convective diffusion calculation with Monte Carlo calculations in Poiseuille flow 14 507
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. Homogeneous nucleation of stearic acid 14 697
Continuum field-diffusion theory for bipolar charging of aerosols 14 541
Diffusion collection efficiency of fibers for aerosol over a wide range of Reynolds numbers 13 403
Diffusion from a laminar stream flowing through a rectangular channel 13 415
Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer 13 331
Diffusion tube; a cloud condensation nucleus counter for use below 0.3% supersaturation 13 297
Diffusion from a viscous stream flowing through a rectangular channel 14 741
Diffusion of aerosols from a stream flowing through a short cylindrical pipe 15 637
Diffusional deposition of aerosols in fibrous filters 12 357, Erratum 13 87
Effect of radial diffusion on penetration of airborne particles through a radial-flow sampler 12 457
Effects of diesel particle loading on screen diffusion batteries 15 447
Evaluation of coarse screens of diffusion cell material for ultrafine aerosols below 0.02μm 19 733
Experimental study of the effect of turbulent diffusion on precipitator efficiency 13 271
Extension of the screen type diffusion battery theory 12 385
Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rates of vapour in a thermal diffusion cloud chamber 13 587
Measurement of particulate and gaseous ammonia at a suburban area by means of diffusion tubes (denuders) 15 465
Note on the deposition of aerosol particles in a channel due to diffusion and electric charge 11 517
Segmented thermal diffusion chamber for continuous measurements (Errata) 11 421

Thermal diffusion of aerosol particles: Lagrangian autocorrelation as an alternative to Langevin's equation **13** 597
Theory and calibration of a screen-type diffusion battery **11** 549
Theory of diffusion charging of arbitrarily shaped conductive aerosol particles by unipolar ions **12** 19

DIFFUSIOPHORESIS
Hydrodynamic approach to particle target efficiency in the presence of diffusiophoresis **11** 521
Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rates of vapour in a thermal diffusion cloud chamber **13** 587
Thermo- and diffusiophoresis for small aerosol particles **12** 1
Thermophoresis and diffusiophoresis of large aerosol particles of different shapes **15** 511

DISPERSITY
Dispersity effects on the ice nucleating activity of copper acetyl acetonate **11** 495
Preparation of uniform colloidal dispersions by chemical reactions in aerosols-2. Spherical particles of aluminium hydrous oxide **11** 271

DISTRIBUTION
Accurate measurements of aerosol size distribution-I. Theory of a plate condenser for bipolar mobility analysis **11** 189
II. Construction of a new plate condenser electric mobility analyzer and first results **11** 201
Charge distribution of ultrafine aerosols undergoing bipolar charging **13** 127
Equilibrium charge distribution on doublets and triplets of uniform 0.500 micrometer diameter polystyrene spheres - an experimental study **11** 415
Equilibrium charge distribution of multiplets of monodisperse latex spheres **14** 499
Experiment and interpretation for fiber size distribution from penetration measurements **16** 3
High-volume screen diffusion batteries and α-spectroscopy for measurement of the radon daughter activity size distributions in the environment **17** 873
Inversion to obtain aerosol size distributions from measurements with a differential mobility analyzer **13** 513
Man-made mineral fibre size distributions utilizing unbiased and fibre length biased counting methods and the bivariate log-normal distribution **14** 139
Measurement of particle dose distribution in a model of a human larynx and tracheobronchial tree **14** 11
Particle number distributions of aerosols from test fires **11** 439
Particle size distribution analysis by scattered light measurements using an optically defined measuring volume **14** 765
Products of lognormal and cumulative lognormal particle size distributions **13** 111
Results of improved size distribution measurements in the Aitken range of atmospheric aerosols **11** 321
Rosin-Rammler size distribution for liquid droplet ensembles **14** 39
Sahara dust program - I. The Italian network of sun- photometers. Extinction models based on multimodal particle size distributions **14** 517, II. Determination of the vertical particulate mass loading by using extinction models based on Junge-type size distributions **14** 529
Size measurement of liquid aerosols **17** 803
Technique for calculation of aerosol particle size distributions from indirect measurements **11** 359
Theoretical equilibrium bipolar charge distributions of chain aggregates with uniform spheres **14** 489
Use of differential mobility analyzers of second order in determining the aerosol size distribution **12** 55 Discussion **12** 59

DOGS
A technique for measuring bronchial mucociliary clearance in unsedated dogs **17** 985

DOPPLER
Aerodynamic particle size measurement by laser-Doppler velocimetry **11** 139
Calibration of an optical particle counter by particle Doppler shift spectrometry in the 4-8 micrometer range **11** 53

DRAG
Drag on modified rectangular prisms **18** 11
Drag on non-spherical, orthotropic aerosol particles **18** 87
Drag force on agglomerated spheres in creeping flow **20** 503

DROPS
Morphology of aerosol particles generated from the evaporation of solution drops **12** 417
Re-evaluation of Millikan's oil drop data for the motion of small particles in air **13** 537

DROPLETS
A new light-scattering technique to measure the diameter of periodically generated moving droplets **17** 157
Behaviour of small droplets in a new model for nucleation **12** 437
Droplet spectra measurements of fan and cone atomisers using a laser diffraction technique **12** 529
Effects of temperature and humidity on the growth and optical properties of sulphuric acid - water droplets in the stratosphere **12** 517
Evaporation and condensational growth of tiny droplets **11** 293
Evaporation and growth of droplets having more than one volatile constituent **12** 505
Investigation of the reaction between single aerosol acid droplets and ammonia gas **15** 661
Measurement of the condensational growth of single hygroscopic acid aerosol droplets **12** 551
Microencapsulation of oil droplets by aerosol technique - I. Metal oxide coatings **19** 511
Rosin-Rammler size distribution for liquid droplet ensembles **14** 39
Spread factors for oil-based and water droplets **17** 169
The behaviour of liquid droplet aerosols in an APS 3300 **17** 921

DRUG
Drug degeneration during ultrasonic nebulization **16** 265

DRUM
The optimum rate of drum rotation for aerosol aging **18** 17

DUST
Applications of closely graded powders of fused alumina as test dusts for aerosol studies **16** 125
Capture of dust particles in filters by line-dipole charged fibres **12** 349
Computer simulation of the filtration process in a fibrous filter collecting polydisperse dust **17** 191
Experimental observation of collection efficiency of a dust-loaded fiber **15** 483
Porous foam size selectors for respirable dust samplers **11** 151
Semi-automatic method for the assessment of electric charge carried by airborne dust **14** 643
Sahara dust program - I. The Italian network of sun- photometers. Extinction models based on multimodal particle size distributions **14** 517, II. Determinations of the vertical particulate mass loading by using extinction models based on Junge - type size distributions **14** 529
Simulation of the growing process of a particle dendrite and evaluation of a single fiber collection efficiency with dust load **11** 377

DUCTS
Time dependent gravitational sedimentation of aerosol particles from steady laminar flows in channels and ducts **11** 161

DYNAMIC
Dynamic shape factors: measurement techniques and results on aggregates of solid primaries **11** 67
Dynamic shape factors of spheres aggregates in an electric field and their dependence on the Knudsen number **16** 69
Dynamic contact charge transfer considering plastic deformation **19** 399
Experimental determination of the dynamic shape factor of the primary sodium peroxide aerosol **17** 79
Numerical solution of aerosol dynamics for simultaneous convection, diffusion and external forces **20** 437

EDITORIAL
Change of Editors and increased frequency **19** 397
'Clean Technology' **20** 401
Editor-in-Chief of the Journal of Aerosol Science **19** 527
Section of Patents and New Principles **19** 271

EFFICIENCY
Diffusion collection efficiency of fibers for aerosol over a wide range of Reynolds numbers **13** 403

Numerical determination of electrically enhanced fiber collection efficiency 14 87
Optical particle counters: response, resolution and counting efficiency 13 529
Perturbation method for the approximation of the inertial collection efficiency for fibrous filters with electrical enhancement 14 463
Sampling efficiency of aerosol samplers for large wind-borne particles - a preliminary report 14 65

ELECTRIC
Effect of neighbouring fibers on the electric field in a fibrous filter 12 137
Photo electric nucleus counters for aerosol climatology 12 477
The chemical response of the photo-electric aerosol sensor (PAS) to different aerosol systems 17 705

ELECTRICAL
Electrical enhancement of filtration in nuclepore filters - I. Experimental design and measurements with spherical particles 16 379
High-resolution electrical mobility aerosol spectrometer (MAS) 14 589
Numerical determination of electrically enhanced fiber collection efficiency 14 87
Perturbation method for the approximation of the inertial collection efficiency for fibrous filters with electrical enhancement 14 463

ELECTRODYNAMICS
Rotational electrodynamics of airborne fibers 16 315

ELECTRON
Aerosol particle charging by free electrons 20 313
First measurements of aerosol particle charging by free electrons - a preliminary report 14 5
Physical and chemical properties of the aerosol produced by the electron beam dry scrubbing of flue gas (ES-Verfahren)17 669
The influence of SO_2 and NH_3 concentrations on the aerosol formation in the electron beam dry scrubbing process 20 7

ELECTROSTATIC
A modified commercial electrostatic aerosol analyzer for size distribution measurements of condensing aerosols in hot, wet stack gases 17 179
A simplified electrostatic aerosol analyzer - TECHNICAL NOTE - 18 581
An asymptotic description of electrostatic precipitation of charged particles in turbulent flow 18 357
Behaviour of electrostatic filters made of fibres or sheets arranged parallel to the airflow 13 249
Cell model of aerosol collection by fibrous filters in an electrostatic field 12 91
Clean room applications of particle deposition from stagnation flow: Electrostatic effects 20 403
Effects of electrostatic charge on the pulmonary deposition of mineral dust aerosols inhaled by rats 19 565
Electrostatic filtration of inertialess particles by granular beds 12 27
Electrostatic charge of aerosol particles from fluidized bed aerosol generator 19 147
Electrostatic mechanisms of aerosol collection by granular filters: A Review 19 651
On the practical significance of electrostatic lung deposition of isometric and fibrous aerosols 16 511
The electrostatic separation of fibres and compact particles 16 229
The effects of electrostatic and inertial forces on the diffusive deposition of small particles onto large disks: Viscous axisymmetric stagnation point flow approximations 20 123

EM (Expectation-Maximization)
EM algorithm reconstruction of particle size distributions from diffusion battery data 16 557

EPIPHANIOMETER
The epiphaniometer, a new device for continuous aerosol monitoring 20 557

EQUILIBRIUM
Equilibrium charge distribution of multiplets of monodisperse latex spheres 14 499
Theoretical equilibrium bipolar charge distributions of chain aggregates with uniform spheres 14 489

EVAPORATION
A variation calculation of the rate of evaporation of small droplets 19 273

Evaporation and growth of droplets having more than one volatile constituent 12 505
Evaporation of sodium and the formation of aerosols 14 163
Evaporative mass losses from particle samples; 14 611
Moment simulation of aerosol evaporation 18 59
Morphology of aerosol particles generated from the evaporation of solution drops 12 417
Quasistationary evaporation of a droplet into a multi-component gaseous mixture 15 545
The interdependence of evaporation and settling for airborne freely falling droplets 20 749

EXPERIMENTAL
Condensation aerosol formation and growth in a laminar coaxial jet: Experimental 17 11
Experimental measurements of the diffusion coefficients and calculated sizes of Pb-212 particles 19 767
Experimental studies of ion clustering: relationship to aerosol formation processes and some atmospheric implications 13 73
Experimental study of the effect of turbulent diffusion on precipitator efficiency 13 271
Experimental studies of the ion-induced binary nucleation 13 285
Experimental study of argon condensation in cryogenic shock tubes 14 755
Experimental observations of particle size dependent, turbulent deposition in a tray dryer and of the directional change of thermodiffusiophoretic forces 15 573
Experimental observation of collection efficiency of a dust-loaded fiber 15 483
Experimental responses of two optical particle counters 15 457
Experimental determination of the dynamic shape factor of the primary sodium peroxide aerosol 17 79
Experimental coarse aerosol reserach: The 'thread-of-droplets' technique - Technical Note - 20 721
On the relationship between experimental data for total deposition and model calculations-Part I: Effect of instrumental dead space 20 141
On the relationship between experimental data for total deposition and model calculations - Part II: Application to fine particle deposition in the respiratory tract 20 149

FERRIC OXIDE
Production of ferric oxide aerosols with a May spinning-top aerosol generator 12 441

FIELDS
Cell model of aerosol collection by fibrous filters in an electrostatic field 12 91
Continuum field-diffusion theory for bipolar charging of aerosols 14 541
Effect of neighbouring fibers on the electric field in a fibrous filter 12 137
General field charging theory for aerosol particle charging and neutralizing in unipolar and bipolar ion fields; 14 127
Radiation fog liquid water acidity at a field station in the Po Valley 14 135

FIBRES
A many-fibre model of airflow through a fibrous filter 15 583
An aerodynamic particle size analyser tested with spheres, compact particles and fibres having a common settling rate under gravity 15 491
Behaviour of electrostatic filters made of fibres or sheets arranged parallel to the airflow 13 249
Capture of dust particles in filters by line-dipole charged fibres 12 349
Diffusion collection efficiency of fibres for aerosol over a wide range of Reynolds numbers 13 403
Etude expérimentale du dépôt de particules fibreuses dans un modèle bronchique rigide 19 73
Effect of neighbouring fibers on the electric field in a fibrous filter 12 137
Fibre collection and measurement with the inertial spectrometer 13 49
Fibre size characterization and size analysis using general and bivariate log-normal distributions 16 407
Laser-based monodisperse carbon fiber generator 13 241
Man-made mineral fibre size distributions utilizing unbiased and fibre length biased counting methods and the bivariate log-normal distribution 14 139
Numerical determination of electrically enhanced fiber collection efficiency 14 87

FIBROUS
A many-fibre model of airflow through a fibrous filter 15 583
A note on the pressure drop across a fibrous filter modelled as a symmetrical array of cylinders - Technical Note 19 385
Bipolar diffusion charging of fibrous aerosol particles - I. Charging theory 15 89
Bipolar diffusion charging of fibrous aerosol particles - II. Charge and electrical mobility measurements on linear chain aggregates 15 103

Capture of dust particles in filters by line-dipole charged fibres 12 349
Cell model of aerosol collection by fibrous filters in an electrostatic field 12 91
Deposition of fibrous aerosol in model bifurcating tubes 18 337
Diffusional deposition of aerosols in fibrous filters 12 357, Erratum 13 87
Effect of neighbouring fibers on the electric field in a fibrous filter 12 137
Fine mist filtration by wet filters - I. Liquid saturation and flow resistance of fibrous filters 16 497
Fine mist filtration by wet filters - II: Efficiency of fibrous filters 20 45
Fine mist filtration by wet filters - III: Sintered disc filters 20 59
The shape selective sampling of fibrous aerosols 19 703
Perturbation method for the approximation of the inertial collection efficiency for fibrous filters with electrical enhancement 14 463

FILTRATION
Computer simulation of the filtration process in a fibrous filter collecting polydisperse dust 17 191
Effect of particle loading on granular bed filtration - The cluster enhanced filter model 19 425
Effect of particle loading on granular bed filtration - Extension of the CEF model to polydisperse systems 19 443
Electrostatic filtration of inertialess particles by granular beds 12 27
Filtration by randomly distributed fibers 16 473
Filtration of aerosols 14 147
Fine mist filtration by wet filters - II: Efficiency of fibrous filters 20 45
Fine mist filtration by wet filters - III. Sintered disc filters 20 59
Maximum penetration of aerosol particles in granular bed filters 12 79
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence 13 321
Viscous flow into a membrane filter composed of randomly situated pores 14 481

FLOW
Diffusion from a laminar stream flowing through a rectangular channel 13 415
Gas-flow diffusion chamber for vapour nucleation studies. Relation between nucleation rate, critical nucleus size and entropy of transition from a metastable into a stable state 16 97
Particle motion in a supersonic vortex flow 18 369
Pulse interval and pulse width measurements in determining the flow characeristics in the viewing volume of single particle optical counters 13 451
Radioactivity analysis and compressible flow capillary system 15 123

FOG
Kinetics of ice nucleation on aerosol particles in supercooled fog - I. The influence of water vapour depletion 18 261, II. Ice crystal growth and precipitations 18 269
Radiation fog liquid water acidity at a field station in the Po Valley 14 135

FOKKER
Deposition of aerosol particles due to simultaneous diffusion and gravitational sedimentation within a spherical chamber - solutions to the Fokker-Planck equations 12 11

FORCES
Direction, magnitude and causes of photophoretic forces 16 29
Experimental observations of particle size dependent, turbulent deposition in a tray dryer and of the directional change of thermodiffusiophoretic forces 15 573
Generalized theory of dispersion forces 20 735

FORMATION
Experimental studies of ion clustering: relationship to aerosol formation processes and some atmospheric implications 13 73
Ion-induced aerosol formation in a H_2O-H_2SO_4 system - I. Extension of the classical theory and search for experimental evidence 16 217

FUEL
Characterization of the particulate emission by a large oil fuel fired power plant 14 557

FUMES
A study of the chemical structure of particles in the welding fumes of mild and stainless steel 15 57

GAMMA
Determination of radon daughter products near land-sea discontinuities by gamma spectrometry 14 495
Penetration of test aerosols through filters described in terms of a gamma distribution of layer efficiencies 18 499

GAS
Determination of aerosol deposition on the front and wake side of spheres by gas-chromatography 18 147
Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer 13 331
Gaseous interference to performance of a quartz crystal aerosol mass monitor 15 473
Gas-flow diffusion chamber for vapour nucleation studies. Relations between nucleation rate, critical nucleus size and entropy of transition from a metastable into a stable state 16 97
Investigation of the reaction between single aerosol acid droplets and ammonia gas 15 661
Measurement of particulate and gaseous ammonia at a suburban area by means of diffusion tubes (denuders) 15 465
Motion and deposition of particles in expanding and oscillating gas bubbles 19 753
Preparation of gas sensitive film by deposition of ultrafine tin dioxide particles 19 253

GENERATION
Aerosol generation by spark discharge - Technical Note - 19 639
Generation and characterization of aerosols of dispersed surface active phospholipids by ultrasonic and jet nebulization 14 683
Generation of monodisperse Ag- and NaCl-aerosols with particle diameters between 2 and 300 nm 14 113
Generation of Diesel particles coated with polycyclic aromatic compounds - evidence suggesting that dinitropyrene formation is a collection artifact 20 627
Generation of benzo(a)pyrene-tagged aerosols 15 183
Morphology of aerosol particles generated from the evaporation of solution drops 12 417
On the continuous operation of the vibrating orifice aerosol generator 17 855

GENERATOR
Condensation aerosol generator system for monodisperse aerosols of different physicochemical properties 13 363
Continuous dispersion of aqueous solutions by a modified vibrating orifice aerosol generator 16 261
Factors affecting aerosol production from a modified Sinclair-La Mer aerosol generator 16 427
Laser-based monodisperse carbon fiber generator 13 241
Production of ferric oxide aerosols with a May spinning-top aerosol generator 12 441
Spinning generators of homogeneous aerosols 15 719
Stable, high-concentration, dry aerosol generator 13 499
The production of aerosols from aqueous solutions using the spinning top generator 15 35
The spinning-top aerosol generator-improving the performance 15 741

GRANULAR
Electrostatic filtration of inertialess particles by granular beds 12 27
Maximum penetration of aerosol particles in granular bed filters 12 79

GRATICULES
Microscope graticule for sizing near-homogeneous particles 14 47

GRAVITATIONAL
Deposition of aerosol particles due to simultaneous diffusion and gravitational sedimentation within a spherical chamber - solutions to the Fokker-Planck equations 12 11
Turbulent deposition and gravitational sedimentation of an aerosol in a vessel of arbitrary shape 12 405

GRAVITY
An aerodynamic particle size analyser tested with spheres, compact particles and fibres having a common settling rate under gravity **15** 491

GROWTH
Droplet growth and diffusion in a low-pressure cloud chamber **16** 145
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere **12** 517
Evaporation and growth of droplets having more than one volatile constituent **12** 505
Growth rate measurements of hygroscopic aerosols under conditions simulating the respiratory tract **12** 247
Growth of sulphate aerosols in the human airways **13** 9
Growth rates for liquid drops **19** 223
Measurement of the condensational growth of single hygroscopic acid aerosol droplets **12** 551
Measurements of growth due to condensation for some common aerosols **20** 289
Stochastic modeling of nucleation and coagulation growth processes for NH_4Cl **13** 345
The growth of ambient aerosols in the conditions of the respiratory system **16** 521

GUINEAN
A continental well-aged aerosol in the Guinean savannah at the level of a trough along the ITCZ **16** 19
General features of the aerosol observed in the Guinean savannah at the level of the ITCZ: influence of the drought **17** 149

HEMISPHERE
Aerosol variation in the western hemisphere Arctic **15** 13

HETEROGENEOUS
Heterogeneous reactions of minerals with sulfur and nitrogen oxides **20** 303
The study of heterogeneous reactions of carbonaceous particles with sulfur and nitrogen oxides using a single particle approach **20** 575

HIGH-RESOLUTION
High-resolution electrical mobility aerosol spectrometer (MAS); **14** 589

HOMOGENEOUS
Binary homogeneous nucleation theory by cluster-cluster interaction with application to the H_2SO_4-H_2O system **12** 61
Condensation by homogeneous nucleation of H_2O, C_6H_6, CCl_4 and CCl_3F in a shock tube **14** 29
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. Homogeneous nucleation of stearic acid **14** 697
Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rates of vapour in a thermal diffusion cloud chamber **13** 587
Microscope graticule for sizing near-homogeneous particles **14** 47
Multistate kinetics of transient-type homogeneous nucleation **12** 399
Rate of homogeneous nucleation in ternary systems **13** 139
Spinning generators of homogeneous aerosols **15** 719

HUMAN
Comparison of experimental and calculated data for the total and regional deposition in the Human lung **16** 133
Deposition of charged particles in the human airways **14** 657
Diffusional deposition of ultrafine aerosols in a human nasal cast **19** 741
Growth of sulphate aerosols in the human airways **13** 9
Inhalation of salt aerosol particles - II. Growth and deposition in the human respiratory tract **19** 611
Long-term retention of particles in the human respiratory tract **16** 295
Mathematical models of particle deposition in the human respiratory tract **15** 697
Measurements of the total and regional deposition of inhaled particles in the human respiratory tract **13** 549

Measurement of particle dose distribution in a model of a human larynx and tracheobronchial tree 14 11
Precipitation of charged particles in human airways 12 131
Sedimentational deposition of 5 μm aerosol particles in the small airways of the human lung 15 683
The human head as a blunt aerosol sampler 19 365
Total and regional deposition of inhaled aerosols in humans 14 599

HUMANOID
Studies of aerosol distributions in a small laboratory and around a humanoid phantom 18 321

HUMIDITY
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere 12 517
Influence of the expansion humidity on the deposition of particles in impactors 12 49
Inhalation of salt aerosol particles - I. Estimation of the temperature and relative humidity of the air in the human upper airways 19 343

HYDROCARBONS
Etude de la formation de particules à partir des hydrocarbures naturels dégages par la végétation 14 99
Particle sizing of soot in flat pre-mixed hydrocarbon oxygen flames by light scattering 19 591

HYDROPHILIC
Collection of hydrophilic and hydrophobic charged submicron particles by charged water droplets 14 703

HYDROPHOBIC
Collection of hydrophilic and hydrophobic charged submicron particles by charged water droplets 14 703

HYGIENE
Etude comparative des reponses d'un ensemble d'appareils de prélèvement utilisés en hygiène industrielle en fonction des paramètres de l'aérosol ambiant 19 41

HYGROSCOPIC
Growth rate measurements of hygroscopic aerosols under conditions simulating the respiratory tract 12 247
Measurement of the condensational growth of single hygroscopic acid aerosol droplets 12 551

ICE
Characteristics of ice-forming nuclei in continental-maritime air 15 147
Ice crystal formation on aerosol particles with a non-uniform surface 13 21
Ice-forming nuclei of maritime origin 17 23
Ice-forming nuclei in Transvaal, Republic of South Africa 19 531
Ice-forming nuclei in air masses over the Gulf of Mexico 19 539
Influence of phloroglucinol aerosol dispersity on its ice-forming activity 12 391
Kinetics of ice nucleation of aerosol particles in supercooled fog. - II. Ice crystal growth and precipitations 18 269
Nature of ice-forming nuclei in marine air masses 18 291
Temperature-supersaturation relation for natural sorption ice-forming nuclei 14 49

IMPACTION
Differential impaction of aerosols 19 603
Greased and oiled substrates as bounce-free impaction surfaces 18 215
Inertial impaction of fine particles at high temperature and high pressure 12 297

IMPACTORS
A novel virtual impactor : calibration and use 16 343
An improved virtual impactor: design and performance 18 203

Classification performance of a rectangular jet virtual impactor - Effect of nozzle width ratio of collection nozzle to acceleration jet 19 243
Influence of the expansion humidity on the deposition of particles in impactors 12 49
Modification of the University of Washington Mark 5 in-stack impactor 20 813
Personal note on the history of the cascade impactor 13 37
The particle trap impactor 19 113
The Andersen impactor: Calibration, wall losses and numerical simulation 20 67
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence 13 321
Uniform deposit impactor 12 333
Use of two virtual impactors in series as an aerosol generator 19 137
Use of backup filters with impactors equipped with a critical orifice - Technical Note - 17 881

INDUSTRIAL
Etude comparative des reponses d'un ensemble d'appareils de prélèvement utilisés en hygiène industrielle en fonction des paramètres de l'aérosol ambiant 19 41

INERT
Emanation of ^{232}U daughter products from submicrometer particles of uranium oxide and thorium dioxide by nuclear recoil and inert gas diffusion 14 75

INERTIAL
Fibre collection and measurement with the inertial spectrometer 13 49
Inertial impaction of fine particles at high temperature and high pressure 12 297
Inertial deposition of particles in the human branching airways 17 795
Perturbation method for the approximation of the inertial collection efficiency for fibrous filters with electrical enhancement 14 463
The effect of gravity on deposition distances in an inertial particle spectrometer 18 193

INERTIALESS
Electrostatic filtration of inertialess particles by granular beds 12 27

INHALATION
Contribution des particules a la toxicité des aérosols obtenus par thermolyse de divers matériaux 19 87
Cyclone samplers for measuring the concentration of inhalable particles in process streams 13 259
Design of a new inhalation device for rodents and primates 20 647
Measurements of the total and regional deposition of inhaled particles in the human respiratory tract 13 549
Pressurized aerosols inhaled through extension devices; 14 69,70
Total and regional deposition of inhaled aerosols in humans 14 599

INHALED See Inhalation

INHALERS
Design and characteristics of a portable breath actuated, particle size selective medical aerosol inhaler 13 1

INSTRUMENTS
Intercomparison of different "absolute" instruments for measurement of aerosol number concentration 13 429

INTEGRAL
Characterisation of aerosol mobility distributions by integral mobility analysis - The method of mobility 12 109

INVERSION
Inversion to obtain aerosol size distributions from measurements with a differential mobility analyzer **13** 513

ION
Bipolar diffusion charging of aerosol particles - II. Influence of the concentration ratio of positive and negative ions on the charge distribution **15** 47
Experimental studies of ion clustering: relationship to aerosol formation processes and some atmospheric implications **13** 73
Experimental studies of the ion-induced binary nucleation **13** 285
Fluctuations of ionic composition of precipitations collected in Corsica related to changes in the origins of incoming aerosols **19** 577
Ion-induced nucleation from sulfur dioxide **16** 43
Ion-induced aerosol formation in a H_2O-H_2SO_4 system - I. Extension of the classical theory and search for experimental evidence **16** 217, II. Numerical calculations and conclusions **17** 715

IRRADIATION
Nuclei production in Alaska air masses under the action of short wave (1850 A) ultraviolet irradiation **14** 475

ISOPYCNIC
Respirable particle density measurements using isopycnic density gradient ultracentrifugation **20** 29

ISOTHERMAL
Particle deposition from a natural convection flow onto a vertical isothermal flat plate **18** 445

JETS
Generation and characterization of aerosol of dispersed surface active phospholipids by ultrasonic and jet nebulization **14** 683
Optical investigation of high-speed aerosol-microjets **13** 471

JUNGE
Sahara Dust Program - II. Determination of the vertical particulate mass loading by using extinction models based on Junge-type size distributions **14** 529

KERNEL
A kernel for combined Brownian and gravitational coagulation **17** 789

KINETICS
On the kinetic of particle reentrainment from surfaces **20** 483

KNUDSEN
Dynamic shape factors of sphere aggregates in an electric field and their dependence on the Knudsen number **16** 69
Thermophoresis of aerosol particles at small Knudsen numbers: theory and experiment **13** 327

KYLE
Extension to the Kyle theory for determining particle concentration by statistics **13** 29

LAG (Time)
Quantitative theory for time lag in nucleation **12** 105

LAGRANGIAN
A Lagrangian approach for the prediction of particle dispersion in turbulent flows **19** 99
Thermal diffusion of aerosol particles: Lagrangian autocorrelation as an alternative to Langevin's equation **13** 597

LAMINAR
Aerosol deposition in two-dimensional laminar stagnation flow **20** 775
Diffusion from a laminar stream flowing through a rectangular channel **13** 415

LANGEVIN
Thermal diffusion of aerosol particles: Lagrangian autocorrelation as an alternative to Langevin's equation **13** 597

LARYNX
Measurement of particle dose distribution in a model of a human larynx and tracheobronchial tree **14** 11

LASER
A laser Doppler method for the determination of particle deposition velocities **20** 381
Diffusion de la lumière par une sphere dans le cas d'un faisceau d'extension finie - 1. Théorie de Lorenz-Mie généralisée: Les Coefficients g_n et leur calcul numerique **19** 47, - 2. Théorie de Lorenz-Mie généralisée: Application à la granulometrie optique **19** 55
Droplet spectra measurements of fan and cone atomisers using a laser diffraction technique **12** 529
Laser-based monodisperse carbon fiber generator **13** 241

LATEX
A precise method to determine the diameter of airborne latex particles **19** 501
The measurement of latex particles sizes using scattering ratios in the Rayleigh scattering size range **20** 331

LIDAR
Remote sounding of aerosols in the lower atmosphere using bistatic CW helium-neon lidar **20** 37

LIGHT
Particle size distribution analysis by scattered light measurements using an optically defined measuring volume **14** 765
Light scattering from oscillating fibers at normal incidence **18** 389

LINE
Capture of dust particles in filters by line-dipole charged fibres **12** 349

LIQUID
Experimental studies of the response of an optical counter to dry and liquid particles of different shape and refractive index **12** 239
Fine mist filtration by wet filters - I. Liquid saturation and flow resistance of fibrous filters **16** 497
Radiation fog liquid water acidity at a field station in the Po Valley **14** 135
Redispersion of fly ash from a liquid nitrogen suspension **12** 39
Rosin-Rammler size distribution for liquid droplet ensembles **14** 39
The Behaviour of liquid droplet aerosols in an APS 3300 **17** 921

LOGNORMAL
Fibre size characterization and size analysis using general and bivariate log-normal distributions **16** 407
Products of lognormal and cumulative lognormal particle size distributions **13** 111

LUNG
Aerosol deposition along the vertical axis of the lung 16 323
An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles-
Part I: Objectives and summary of results 20 169
Part II: Lung clearance of inhaled cobalt oxide in man 20 189
Part III: Lung clearance of inhaled cobalt oxide particles in baboons 20 205
Part IV: Lung clearance of inhaled cobalt oxide particles in Beagle dogs 20 219
Part V: Lung clearance of inhaled cobalt oxide particles in hamsters, rats and guinea-pigs 20 233
Part VI: Lung clearance of inhaled cobalt oxide partices in SPF Fischer rats 20 249
Part VII: Lung clearance of inhaled cobalt oxide particles in Sprague-Dawley rats 20 257
Part VIII: Lung clearance of inhaled cobalt oxide particles in mice 20 261
Deposition of fibers in the rat lung 20 355
Factors affecting the clearance of fused aluminosilicate particles from the rat lung 19 689
Inspiratory VS expiratory aerosol deposition in excised dog lungs 18 49
On the practical significance of electrostatic lung deposition of isometric and fibrous aerosols 16 511
Sedimentational deposition of 5 μm aerosol particles in the small airways of the human lung 15 683
Quantitative measurement of total aerosol lung deposition: comparison of three different techniques 16 367

MARINE
Marine aerosols in Pacific upwelling regions 18 277
Nature of ice-forming nuclei in marine air masses 18 291

MASS
A soluble one-dimensional problem for coupled heat conduction and mass diffusion with aerosol formation in a vapour-gas mixture 17 129
Evaporative mass losses from particle samples 14 611
Gaseous interference to performance of a quartz crystal aerosol mass monitor 15 473
Nuclei production in Alaska air masses under the action of short wave (1850 Å) ultraviolet irradiation 14 475
On the physics of Aitken particles in polar air mass systems 17 73
Response of a quartz crystal aerosol mass monitor to sulfate and nitrate aerosols 14 633
Sahara Dust Program - II. Determination of the vertical particulate mass loading by using extinction models based on Junge-type size distributions 14 529

MATHEMATICAL
A mathematical theory to two-dimensional blunt body sampling 17 839
Mathematical models of particle deposition in the human respiratory tract 15 697
Mathematical technique for analyzing drop-freezing data 17 887

MAY
Production of ferric oxide aerosols with a May spinning-top aerosol generator 12 441

MEASUREMENTS
Bipolar diffusion charging of fibrous aerosol particles - II. Charge and electrical mobility measurements on linear chain aggregates 15 103
Droplet spectra measurements of fan and cone atomisers using a laser diffraction technique 12 529
Experiment and interpretation for fiber size dsitribution from penetration measurements 16 3
Fibre collection and measurement with the inertial spectrometer 13 49
First measurements of aerosol particle charging by free electrons - a preliminary report 14 5
Growth rate measurements of hygroscopic aerosols under conditions simulating the respiratory tract 12 247
Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rates of vapour in a thermal diffusion cloud chamber 13 587
In situ measurement of adsorption and condensation of a polyaromatic hydrocarbon on ultrafine C particles by means of photoemission 17 699
Intercomparison of different "absolute" instruments for measurement of aerosol number concentration 13 429
Measurement of the condensational growth of single hygroscopic acid aerosol droplets 12 551
Measurement of particle dose distribution in a model of a human larynx and tracheobronchial tree 14 11
Measurement of the deposition of small particles in stationary and oscillating turbulent pipe flow 14 615

Measurement of the water cycle in a levitated ammonium sulfate particle 15 563
Measurements of the total and regional deposition of inhaled particles in the human respiratory tract 13 549
Measurements of atmospheric turbidity from a network of sun-photometers in Italy during ALPEX 15 595
Measurement of particulate and gaseous ammonia at a suburban area by means of diffusion tubes (denuders) 15 465
Measurements of viscous drag on cylinders and chains of spheres with aspect ratios between 2 and 50 16 535
Measurement of ultrafine aerosol particles size distributions at low concentrations by parallel arrays of a diffusion battery and a condensation nucleus counter in series 20 471
Particle size distribution analysis by scattered light measurements using an optically defined measuring volume 14 765
Problems in the measurement of thermophoretic velocities of aerosol particles 19 167
Pulse interval and pulse width measurements in determining the flow characteristics in the viewing volume of single particle optical counters 13 451
Quantitative measurement of total aerosol lung deposition: comparison of three different techniques 16 367
Slip correction measurements for aerosol particles of doublet and triangular triplet aggregates of spheres 16 57

MEDICAL
Design and characteristics of a portable breath actuated, particle size selective medical aerosol inhaler 13 1

MICROJETS
Optical investigation of high-speed aerosol-microjets 13 471

MICROPROCESSOR
Royco 218 portable particle counter automation implemented by a microprocessor system 14 581

MICROSCOPE
Microscope graticule for sizing near-homogeneous particles 14 47

MIGRATION
Space-charge effects in aerosol charging and migration 12 307

MILLIKAN
Re-evaluation of Millikan's oil drop data for the motion of small particles in air 13 537
Cunningham correction factor and accommodation coefficient: Interpretation of Millikan's Data 20 347

MINERAL
Mineral aerosols and source identification 18 1

MOBILITY
Calibration of differential mobility analyser by visual method 12 339
Characterisation of aerosol mobility distributions by integral mobility analysis - The method of mobility moments 12 109
Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer 13 331
Inversion to obtain aerosol size distribution from measurements with a differential mobility analyzer 13 513
Use of differential mobility analyzers of second order in determining the aerosol size distribution 12 55
Discussion 12 59

MOLECULE
Molecule and aerosol particle wall losses in smog chambers made of glass 20 113

MONITORING
Comparisons of particle counters used for monitoring in remote areas 15 523
The epiphaniometer, a new device for continuous aerosol monitoring 20 557

MONODISPERSE
A semi-automated system for measuring the penetration of respirable-sized aerosols through filters 16 415
Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Condensation aerosol generator system for monodisperse aerosols of different physicochemical properties 13 363
Equilibrium charge distribution of multiplets of monodisperse latex spheres 14 499
Generation of monodisperse Ag- and NaCl-aerosols with particle diameters between 2 and 300 nm 14 113
Generation of monodisperse metallic, metal oxide and carbon aerosols 18 175
Laser-based monodisperse carbon fiber generator 13 241

MONTE CARLO
Comparison of convective diffusion calculations with Monte Carlo calculations in Poiseuille flow 14 507
Monte-Carlo simulations of slip corrections of spheres and cubes 20 533

MORPHOLOGY
Morphological control of particles generated from the evaporation of solution droplets: Theoretical considerations 18 511, Experiment 18 525

MULTICOMPONENT
Quasistationary evaporation of a droplet into a multicomponent gaseous mixture 15 545

MULTIMODAL
Human respiratory tract deposition using multimodal aerosols 13 337
Sahara dust program - I. The Italian network of sun-photometers. Extinction models based on multimodal particle size distributions 14 517

MULTISTATE
Multistate kinetics of transient-type homogeneous nucleation 12 399

NASAL
Mechanisms of aerosol deposition in a nasal model 16 529

NEBULIZATION
Generation and characterization of aerosols of dispersed surface active phospholipids by ultrasonic and jet nebulization 14 683

NEUTRALIZING
General field charging theory for aerosol particle charging and neutralizing in unipolar and bipolar ion fields 14 127

NEUTRALIZERS
Radiolytic condensation nuclei in aerosol neutralizers; 14 23

NEUTRON
Evaluation of filter behavior by neutron radiography 18 311

NITRATE
Large particle nitrate artifacts in the aerodynamic size distributions of ambient aerosols 20 667

Response of a quartz crystal aerosol mass monitor to sulfate and nitrate aerosols 14 633

NITROGEN
Redispersion of fly ash from a liquid nitrogen suspension 12 39
The study of heterogeneous reactions of carbonaceous particles with sulfur and nitrogen oxides using a single particle approach 20 575

NON-SPHERICAL
Drag on non-spherical, orthotropic aerosol particles 18 87
On the orientation distribution function of non-spherical aerosol particles in a general shear flow - II. The turbulent case 19 197

NON-UNIFORM
Ice crystal formation on aerosol particles with a non-uniform surface 13 21

NON-ZERO
Continuum field-diffusion charging of particles possessing non-zero initial charge 18 409

NOZZLES
Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction 13 59

NUCLEAR
Emanation of ^{232}U daughter products from submicrometer particles of uranium oxide and thorium dioxide by nuclear recoil and inert gas diffusion 14 75

NUCLEATION
Analysis of various nucleation mechanisms for sulfate particles in the stratosphere 13 561
Behaviour of small droplets in a new model for nucleation 12 437
Binary homogeneous nucleation theory by cluster-cluster interaction with application to the H_2SO_4-H_2O system 12 61
Binary nucleation of methanesulfonic acid and water 20 585
Condensation by homogeneous nucleation of H_2O, C_6H_6, CCl_4 and CCl_3F in a shock tube 14 29
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. Homogeneous nucleation of stearic acid 14 697
Experimental studies of the ion-induced binary nucleation 13 285
Gas-Flow diffusion chamber for vapour nucleation studies. Relations between nucleation rate, critical nucleus size and entropy of transition from metastable into a stable state 16 97
Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rate of vapour in a thermal diffusion cloud chamber 13 587
Ion-induced nucleation from sulfur dioxide 16 43
Multistate kinetics of transient-type homogeneous nucleation 12 399
Nucleation, Current work on 13 604; 14 173,573, 12 89, 390,562
Nucleation and growth of metallic particles in evaporation plumes 18 139
Nucleation of trace amounts of condensible vapors in an expanding gas jet -Technical Note -19 153
Nucleation terminology 16 575
Observation of ion clusters in ion-induced NH_4Cl nucleation 17 95
Quantitative theory for time lag in nucleation 12 105
Rate of homogeneous nucleation in ternary systems 13 139
Stochastic modeling of nucleation and coagulation growth processes for NH_4Cl 13 345

NUCLEI
Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Characterisitics of ice-forming nuclei in continental-maritime air 15 147
Cumulative chemical composition of atmospheric cloud condensation nuclei 15 709
Filter penetration measurements using a condensation nuclei counter and an aerosol photometer 19 471
Nuclei production in Alaska air masses under the action of short wave (1850 Å) ultraviolet irradiation 14 475
Radiolytic condensation nuclei in aerosol neutralizers 14 23

Temperature-supersaturation relation for natural sorption ice-forming nuclei 14 49
Supersaturation and expansion ratios in condensation nuclei counters: an historical perspective 13 481

NUCLEUS (Counters)
An investigation into the loss of particles by diffusion in the Nolan-Pollak condensation nucleus counter 15 177
Calibration formulas for the Pollak condensation nucleus counter 13 121
Development of a mixing type condensation nucleus counter 13 231
Diffusion tube; a cloud condensation nucleus counter for use below 0.3% supersaturation 13 297
Estimation of supersaturation attained in a condensation nucleus counter 15 553
Evaluation of aerosol deconvolution algorithms for determining submicron particle size distributions with diffusion battery and condensation nucleus counter 20 477
Measurement of ultrafine aerosol particle size distributions at low concentrations by parallel arrays of a diffusion battery and a condensation nucleus counter series 20 471
On the influence of the vapour substance on the behaviour of an expansion-type condensation nucleus counter 16 457
Photo electric nucleus counters for aerosol climatology 12 477
Response characteristics for four different condensation nucleus counters to particles in the 3-50 nm diameter range 16 443
The Nolan-Pollak condensation nucleus counter 16 245
University of Missouri-Rolla, absolute Aitken nucleus counter 13 373

NUMERICAL
A numerical study of inertial errors in anisokinetic sampling 20 367
Fast numerical procedure for determining the saddle point of a free energy surface 12 75
Numerical determination of electrically enhanced fiber collection efficiency 14 87
Numerical solution of aerosol dynamics for simultaneous convection, diffusion and external forces 20 437

NUMBER (concentration)
Intercomparison of different "absolute" instruments for measurement of aerosol number concentration 13 429

OPTICAL
Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer 13 331
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere 12 517
Experimental studies of the response of on optical counter to dry and liquid particles of different shape and refractive index 12 239
Experimental responses of two optical particle counters 15 457
Optical particle counters: response, resolution and counting efficiency 13 529
Optical investigation of high-speed aerosol-microjets 13 471
Optical diameters of aggregate aerosols 15 615
Optical and dynamical properties of fractal clusters of carbonaceous smoke 20 765
Particle size distribution analysis by scattered light measurements using on optically defined measuring volume 14 765
Pulse interval and pulse width measurements in determining the flow characteristics in the viewing

volume of single particle optical counters 13 451
ORIFICE
On the continuous operation of the vibrating orifice aerosol generator 17 855

OXIDES
Emanation of ^{232}U daughter products from submicrometer particles of uranium oxide and thorium dioxide by nuclear recoil and inert gas diffusion 14 75
Production of ferric oxide aerosols with a May spinning-top aerosol generator 12 441

PARALLEL (and plates)
Behaviour of electrostatic filters made of fibres or sheets arranged parallel to the airflow 13 249

PARTICLES
Acoustically based aerosol particle sizing technique 12 255
Analysis of various nucleation mechanisms for sulfate particles in the stratosphere 13 561
Bipolar diffusion charging of aerosol particles - I. Experimental results within the diameter range 4-30 nm 14 671
Bipolar diffusion charging of fibrous aerosol particles - II. Charge and electrical mobility measurements on linear chain aggregates 15 103
Capture of dust particles in filters by line-dipole charged fibres 12 349
Collection of hydrophilic and hydrophobic charged submicron particles by charged water droplets 14 703
Comparisons of particle counters used for monitoring in remote areas 15 523
Correction to the small-time approximation of diffusive deposition from a uniform initial concentration of particles in a circular tube with adsorbing walls 12 15
Cyclone samplers for measuring the concentration of inhalable particles in process streams 13 259
Deposition of charged particles; A note on 12 387
Deposition of aerosol particles due to simultaneous diffusion and gravitational sedimentation within a spherical chamber - solutions to the Fokker-Planck equations 12 11
Deposition of aerosol particles in a straight tube with a abrupt obstruction 15 167
Deposition of charged particles in the human airways 14 643
Design and characteristics of a portable breath actuated, particle size selective medical aerosol inhaler 13 1
Determination of deposition velocity onto a wafer for particles in the size range between 0.03 and 0.8 μm 20 787
Effect of radial diffusion on penetration of airborne particles through a radial-flow sampler 12 457
Effect of temperature on the structure and density of ammonium chloride particles 12 467
Electrostatic filtration of inertialess particles by granular beds 12 27
Emanation of ^{232}U daughter products submicrometer particles of uranium oxide and thorium dioxide by nuclear recoil and inert gas diffusion 14 75
Entrance of airborne particles into a blunt sampling head 12 541
Etude de la formation de particules à partir des hydrocarbures naturels dégages par la végétation 14 99
Evaporative mass losses from particle samples 14 611
Experimental studies of the response of an optical counter to dry and liquid particles of different shape and refractive index 12 239
Experimental observations of particle size dependent, turbulent deposition in a tray dryer and of the directional change of thermodiffusiophoretic forces 15 573
Extension to the Kyle theory for determining particle concentration by statistics 13 29
First measurements of aerosol particle charging by free electrons - a preliminary report 14 5
General field charging theory for aerosol particle charging and neutralizing in unipolar and bipolar ion fields 14 127
Generation of monodisperse Ag- and NaCl-aerosols with particle diameters between 2 and 300 nm 14 113
Ice crystal formation on aerosol particles with a non-uniform surface 13 21
Inertial impaction of fine particles at high temperature and high pressure 12 297
Influence of the expansion humidity on the deposition of particles in impactors 12 49
Maximum penetration of aerosol particles in granular bed filters 12 79
Measurement of particle dose distribution in a model of a human larynx and tracheobronchial tree 14 11
Measurement of the deposition of small particles in stationary and oscillating turbulent pipe flow 14 615
Measurement of the water cycle in a levitated ammonium sulfate particle 15 563
Measurements of the total and regional deposition of inhaled particles in the human respiratory tract 13 549

Microscope graticule for sizing near-homogeneous particles 14 47
Morphology of aerosol particles generated from the evaporation of solution drops 12 417
Note on the use of a photoelectric counter for total particle counting 13 93
Optical particle counters: response, resolution and counting efficiency 13 529
Optical particle sizing Theory and practice - Conference Report - 19 265
Particle deposition in the wake of charged spheres 13 491
Particle deposition from a natural convection flow onto a vertical isothermal flat plate 18 445
Discussion - 20 137, Authors' Reply - 20 138
Particle size distribution analysis by scattered light measurements using an optically defined measuring volume 14 765
Particle emission from gasoline powered vehicles: Emission, deposition and re-emission under different traffic density situations 17 973
Precipitation of charged particles in human airways 12 131
Products of lognormal and cumulative lognormal particle size distributions 13 111
Pulse interval and pulse width measurements in determining the flow characteristics in the viewing volume of single particle optical counters 13 451
Re-evaluation of Millikan's oil drop data for the motion of small particles in air 13 537
Royco 218 portable particle counter automation implemented by a microprocessor system 14 581
Sahara dust program - I. The Italian network of sun-photometers. Extinction models based on multimodal particle size distributions 14 517
Sampling efficiency of aerosol samplers for large wind-borne particles - a preliminary report 14 65
Selected inorganic chemical composition of mainstream cigarette smoke as a function of aerodynamic particle size 13 459
The effects of electrostatic and inertial forces on the diffusive deposition of small particles onto large disks: Viscous axisymmetric stagnation point flow approximations 20 123
Theory of diffusion charging of arbitrarily shaped conductive aerosol particles by unipolar ions 12 19
Thermal diffusion of aerosol particles: Lagrangian auto-correlation as an alternative to Langevin's equation 13 597
Thermo- and diffusiophoresis for small aerosol particles 12 1
Thermophoresis of aerosol particles at small Knudsen numbers: theory and experiment 13 327
Transport of discrete particles in inhomogeneous turbulence 14 729
Use of bacteria as model nonspherical aerosol particles 16 193

PARTICULATE
Characterization of the particulate emission by a large oil fuel fired power plant 14 557
Sahara dust program - II. Determination of the vertical particulate mass loading by using extinction models based on Junge-type size distributions 14 529

PENETRATION
A semi-automated system for measuring the penetration of respirable-sized aerosols through filters 16 415
Effect of radial diffusion on penetration of airborne particles through a radial-flow sampler 12 457
Experiment and interpretation for fiber size distribution from penetration measurements 16 3
Maximum penetration of aerosol particles in granular bed filters 12 79
Penetration measurements for tube and screen-type diffusion batteries in the ultrafine particle size range 15 673
Penetration of atmospheric aerosols during collection in cellulose filters, studied by secondary ion mass spectrometry 20 569

PERSONAL NOTES
Professor Charles Norman Davies' Seventy-Fifth Birthday 16 91
A salute to David Sinclair on his retirement from duty with the Environmental Measurements Laboratory 17 225
Professor Harald Straubel's Eightieth Birthday 17 113

PERTURBATION
Perturbation method for the approximation of the inertial collection efficiency for fibrous filters with electrical enhancement 14 463

PHANTOM
Studies of aerosol distributions in a small laboratory and around a humanoid phantom 18 321

PHLOROGLUCINOL
Influence of phloroglucinol aerosol dispersity on its ice-forming activity 12 391

PHOSPHOLIPIDS
Generation and characterization of aerosols of dispersed surface active phospholipids by ultrasonic and jet nebulization 14 683

PHOTODEGRADATION
A smog chamber study on the impact of aerosols on the photodegradation of chemicals in the troposphere 18 65

PHOTOEMISSION
Improved aerosol-photoemission sensor for detection of particulate emissions from combustions TECHNICAL NOTE 19 633
Multiple charging of ultrafine aerosol particles by aerosol photoemission (APE) 19 485

PHOTOELECTRIC
Note on the use of a photoelectric counter for total particle counting 13 93
Photo electric nucleus counters for aerosol climatology 12 477
The chemical response of the photo-electric aerosol sensor (PAS) to different aerosol systems 17 705

PHOTOMETERS
Filter penetration measurements using a condensation nuclei counter and an aerosol photomter 19 471
Measurements of atmospheric turbidity from a network of sun-photometers in Italy during Alpex 15 595
Sahara dust program - I. The Italian network of sun-photometers. Extinction models based on multimodal particle size distributions 14 517

PHOTON
Extraction of polydispersity information from photon correlation data 20 91
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence 13 321

PHOTOPHORECTIC
Direction, magnitude and causes of photophoretic forces 16 29

PHYSICAL
On physical properties of aerosol at Ross Island, Antartica 17 937
Physical and chemical properties of the aerosol produced by the electron beam dry scrubbing of flue gas (ES-Verfahren) 17 669
Some physical properties of a black aerosol 16 391

PHYSICO
Condensation aerosol generator system for monodisperse aerosols of different physicochemical properties 13 363

PIPE FLOW
Measurement of the deposition of small particles in stationary and oscillating turbulent pipe flow 14 615

PLUMES
Nucleation and growth of metallic particles in evaporation plumes 18 139

PMS
Performance of PMS model LAS-X optical particle counter 17 67

POISEUILLE
Comparison of convective diffusion calculations with Monte Carlo calculations in Poiseuille flow 14 507

POLLAK
Calibration of Pollak condensation nuclei counters using charged, monodisperse aerosols 13 419
Calibration formulas for the Pollak condensation nucleus counter 13 121

PORES
Nuclepore filters as diffusion screens: effect of barrel-shaped pore distortions 16 307
Viscous flow into a membrane filter composed of randomly situated pores 14 481

PO VALLEY
Radiation fog liquid water acidity at a field station in the Po Valley 14 135

PRESSURE
A note on the pressure drop across a fibrous filter modelled as a symmetrical array of cylinders - TECHNICAL NOTE - 19 385
A study of low pressure particle impaction process 20 701
Droplet growth and diffusion in a low-pressure cloud chamber 16 145
Effect of size distribution of condensation nuclei on pressure in an expansion counter 18 381
Inertial impaction of fine particles at high temperature and high pressure 12 297
Pressure losses in random wire matrices at intermediate Reynolds numbers 15 625

PRESSURIZED
Pressurized aerosols inhaled through extension devices; 14 69,70

PRECIPITATION
Experimental study of the effect of turbulent diffusion on precipitator efficiency 13 271
Precipitation of charged particles in human airways 12 131

PROCESS (streams)
Stochastic modeling of nucleation and coagulation growth processes for NH_4Cl 13 345
Cyclone samplers for measuring the concentration of inhalable particles in process streams 13 259
Experimental studies of ion clustering: relationship to aerosol formation processes and some atmospheric implications 13 73

PULMONARY
Aerosol recovery following breathholding derived from the distribution of chordlengths in pulmonary tissue 20 267

PULSE
Charging of particles with intense visible light pulses 19 491
Pulse interval and pulse width measurements in determining the flow characteristics in the viewing volume of single particle optical counters 13 451

QUARTZ
Aerosol mass determination with nuclear track filters from quartz crystals 17 859
Gaseous interference to performance of a quartz crystal aerosol mass monitor 15 473
Response of a quartz crystal aerosol mass monitor to sulfate and nitrate aerosol 14 633

QUASISTATIONARY
Quasistationary evaporation of a droplet into a multi-component gaseous mixture 15 545

RADIAL
Effect of radial diffusion on penetration of airborne particles through a radial-flow sampler 12 457

RADIATION
Radiation fog liquid water acidity at a field station in the Po Valley 14 135

RADIOACTIVITY
Evaluation de l'exposition naturelle due à l'inhalation des aérosols radioactifs issus du radon à l'interieur des locaux d'habitation 19 27
Radioactivity analysis and compressible flow capillary system 15 123

RADIOLYTIC
Radiolytic condensation nuclei in aerosol neutralizers; 14 23

RADON
Attachment of radon and thoron progeny to the surface of different materials - TECHNICAL NOTE - 17 753
Determination of radon daughter products near land-sea discontinuities by gamma spectrometry 14 495
Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer 13 331
High volume screen diffusion batteries and α-spectroscopy for measurement of the radon daughter activity size distribution in the environment 17 873
Radon daughter and thoron daughter deposition velocity and unattached fraction under laboratory-controlled conditions and in underground uranium mines 16 157

REACTOR
Size and activity distributions of aerosols in the turbine building of a boiling-water-reactor plant 16 437

RECTANGULAR
Diffusion from a laminar stream flowing through a rectangular channel 13 415
Diffusion from a viscous stream flowing through a rectangular channel 14 741

REDISPERSION
Redispersion of fly ash from a liquid nitrogen suspension 12 39

RE-EVALUATION
Re-evaluation of Millikan's oil drop data for the motion of small particles in air 13 537

REFRACTIVE
Experimental studies of the response of an optical counter to dry and liquid particles of different shape and refractive index 12 239

REGIONAL
Measurements of the total and regional deposition of inhaled particles in the human respiratory tract 13 549
Total and regional deposition of inhaled aerosols in humans 14 599

REPORT
Report of the inaugural meeting of the aerosol society 18 467

RESPIRATORY
Growth rate measurements of hygroscopic aerosols under conditions siumulating the respiratory tract 12 247
Human respiratory tract deposition using multimodal aerosols 13 337
Long-term retention of particles in the human respiratory tract 16 295

Mathematical models of particle deposition in the human respiratory tract 15 697
Measurements of the total and regional deposition of inhaled particles in the human respiratory tract 13 549
Respiratory tract retention of relatively insoluble particles in rodents 16 279
The growth of ambient aerosols in the conditions of the respiratory system 16 521

RESUSPENSION
The time dependence of the resuspension of particles TECHNICAL NOTE 20 839

REYNOLDS
Diffusion collection efficiency of fibers for aerosol over a wide range of Reynolds numbers 13 403
Pressure losses in random wire matrices at intermediate Reynolds numbers 15 625
Theoretical adhesion efficiency for particles impacting a cylinder at high Reynolds number 17 827

RIGHT-ANGLES
Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction 13 59

ROSIN-RAMMLER
Rosin-Rammler size distribution for liquid droplet ensembles 14 39

ROTATION
The Optimum rate of drum rotation for aerosol aging 18 17

ROYCO
Royco 218 portable particle counter automation implemented by a microprocessor system 14 581

SADDLE POINT
Fast numerical procedure for determining the saddle point of a free energy surface 12 75

SAHARA
Sahara dust program - I. The Italian network of sun-photometers. Extinction models based on multimodal particle size distributions 14 517, II. Determinations of the vertical particulate mass loading by using extinction models based on Junge-type size distributions 14 529

SAMPLERS
Aerosol testing techniques for size-selective samplers 14 713
Aerosol sampling by an annular slot sampler with a smooth aspiration tube entrance 19 725
A static particle size selective bioaerosol sampler for the ambient atmosphere 20 829
Cyclone samplers for measuring the concentration of inhalable particles in process streams 13 259
Effect of radial diffusion on penetration of airborne particles through a radial-flow sampler 12 457
Sampling efficiency of aerosol samplers for large windborne particles - a preliminary report 14 65

SAMPLES
Evaporative mass losses from particle samples 14 611
Experimental improvements in analysis of aerosol samples by X-ray powder diffraction 16 373
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence 13 321

SAMPLING
A numerical study of inertial errors in anisokinetic sampling 20 367
Entrance of airborne particles into a blunt sampling head 12 541

Sampling efficiency of aerosol samplers for large windborne particles - a preliminary report 14 65
Theoretical and experimental studies for determing the aerosol sampling efficiency of annular slot probes 16 335

SATELLITE
Properties of satellite and primary aerosols from a modified May spinning-top aerosol generator 19 307

SATURATION
Fine mist filtration by wet filters - I. Liquid saturation and flow resistance of fibrous filters 16 497

SEASONAL
Seasonal variation in Antarctic aerosol 12 491

SECOND ORDER
Use of differential mobility analyzers of second order in determining the aerosol size distribution 12 55
(Discussion of) 12 59

SEDIMENTATION
Deposition of aerosol particles due to simultaneous diffusion and gravitational sedimentation within a spherical chamber - solutions to the Fokker-Planck equations 12 11
Sedimentational deposition of 5μm aerosol particles in the small airways of the human lung 15 683
Turbulent deposition and gravitational sedimentation of an aerosol in a vessel of arbitrary shape 12 405

SHAPE
Dynamic shape factors of sphere aggregates in an electric field and their dependence on the Knudsen number 16 69
Experimental studies of the response of an optical counter to dry and liquid particles of different shape and refractive index 12 239
Theory of diffusion charging of arbitrarily shaped conductive aerosol particles by unipolar ions 12 19
Thermophoresis and diffusiophoresis of large aerosol particles of different shapes 15 511
Turbulent deposition and gravitational sedimentation of an aerosol in a vessel of arbitrary shape 12 405

SHEET
Behaviour of electrostatic filters made of fibres or sheets arranged parallel to the airflow 13 249

SHORT WAVE
Nuclei production in Alaska air masses under the action of short wave (1950 Å) ultraviolet irradiation 14 475

SILICON
Etude des caractéristiques du silicium et de l'aluminium atmosphérique 14 747

SIZE
Aerosol testing techniques for size-selective samplers 14 713
Deposition of particles in the human respiratory tract in the size range 0.005-15 μm 17 811
Design and characteristics of a portable breath actuated, particle size selective medical aerosol inhaler 13 1
Dilution of cigarette smoke for real time aerodynamic sizing with a SPART analyzer 13 103
Selected inorganic chemical composition of mainstream cigarette smoke as a function of aerodynamic particle size 13 459

SIZE DISTRIBUTION See Distribution

SLIP COEFFICIENT
Note on the slip coefficient of doublets of spheres **14** 753

SLIP CORRECTION
Slip correction measurements for aerosol particles of doublet and triangular triplet aggregates of spheres **16** 57

SLIT
Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer **13** 331

SMOKE
A new method to determine the relation between the particle size and chemical composition of tobacco smoke particles **18**123
A technique for radio-labelling tar particulate material in mainstream cigarette smoke **19** 715
Cigarette smoke: Generation and properties of the aerosol **19** 463
Determination of cigarette smoke particle density from mass and mobility measurements in a Millikan cell **19** 587
Dilution of cigarette smoke for real time aerodynamic sizing with a SPART analyzer **13** 103
Selected inorganic chemical composition of mainstream cigarette smoke as a function of aerodynamic particle size **13** 459

SMOG
A smog chamber study on the impact of aerosols on the photodegradation of chemicals in the troposphere **18** 65

SMOLUCHOWSKI AWARD
(GAeF) **17** 1001; **18** 115,947; **20** 853
1987 Recipient: Dr. Helmut Bunz **18** 945
1989 Recipient: Prof. Dr. Ing. Leon Gradon **20** 851

SMOLUCHOWSKI
Marian Smoluchowski Ritter von Smolan **18** 113

SODIUM
Evaporation of sodium and the formation of aerosols **14** 163
Experimental determination of the dynamic shape factor of the primary sodium peroxide aerosol **17** 79

SOURCES
The interpretation of alpha energy spectra from particulate sources **15** 533
Source apportionment of particulate air pollutants in Japan **19** 381

SPACE
Space-charge effects in aerosol charging and migration **12** 307

SPART
Dilution of cigarette smoke for real time aerodynamic sizing with a SPART analyzer **13** 103
Use of bacteria as model nonspherical aerosol particles **16** 193

SPECTRA
Droplet spectra measurements of fan and cone atomisers using a laser diffraction technique **12** 529
The interpretation of alpha energy spectra from particulate sources **15** 533

SPECTROMETRY SPECTROMETERS SPECTROSCOPY
Characterization of inorganic salt particles by Raman spectroscopy **20** 609

Determination of radon daughter products near land-sea discountinuities by gamma spectrometry 14 495
Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer 13 331
Etude par spectroscopie de vibration des particules atmospheriques 19 33
Fibre collection and measurement with the inertial spectrometer 13 49
High-resolution electrical mobility aerosol spectrometer (MAS) 14 589
Nouveau spectromètre diffusionnel et inertiel 19 19
Particle deposition within the inertial spectrometer 18 37
Penetration of atmospheric aerosols during collection in cellulose filters, studied by secondary ion mass spectrometry 20 569
Recent advances in aerosol analysis by infrared spectroscopy 20 441
The effect of gravity on deposition distances in an inertial particle spectrometer 18 193

SPHERES
An aerodynamic particle size analyser tested with spheres, compact particles and fibres having a common settling rate under gravity 15 491
Dynamic shapes factors of sphere aggregates in an electric field and their dependence on the Knudsen number 16 69
Equilibrium charge distribution of multiplets of monodisperse latex spheres 14 499
Monte-Carlo simulations of slip corrections of spheres and cubes 20 533
Note on the slip coefficient of doublets of spheres 14 753
Particle deposition in the wake of charged spheres 13 491
Slip correction measurements for aerosol particles of doublet and triangular triplet aggregates of spheres 16 57

SPHERICAL
Collection of uncharged prolate spheroidal aerosol particles by spherical collectors - I: 2D motion 20 515
Deposition of aerosol particles due to simultaneous diffusion and gravitational sedimentation within a spherical chamber - solutions to the Fokker-Planck equations 12 11

SPINNING TOP
Production of ferric oxide aerosols with a May spinning-top aerosol generator 12 441
Spinning generators of homogeneous aerosols 15 719
The production of aerosols from aqueous solutions using the spinning top generator 15 35
The spinning-top aerosol generator-improving the performance 15 741

STAGNATION
Aerosol deposition in two-dimensional laminar stagnation flow 20 775

STATISTICS
Extension to the Kyle theory for determining particle concentration by statistics 13 29
Statistics of multiple counting in aerosol counters 15 69
Statistics of multiple counting in aerosol counters - II. Concentration counters 17 87

STEEL
A study of the chemical structure of particles in the welding fumes of mild and stainless steel 15 57
Surface and bulk chemical analysis on metal aerosols generated by manual metal arc welding of stainless steel 17 1

STEREOPSIS
Image enhancement of aggregate aerosols by stereopsis 16 211

STOCHASTIC
Stochastic modeling of nucleation and coagulation growth processes for NH_4Cl 13 345

STRATOSPHERE
Analysis of various nucleation mechanisms for sulfate particles in the stratosphere 13 561
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere 12 517

STREAM
Cyclone samplers for measuring the concentration of particles in process streams 13 259
Diffusion from a laminar stream flowing through a rectangular channel 13 415
Diffusion of aerosols from a stream flowing through a short cylindrical pipe 15 637
Selected inorganic chemical composition of mainstream cigarette smoke as a function of aerodynamic particle size 13 459

STRUCTURE
Blockage of porous structures caused by the deposition of aerosol particles 15 503
Effect of temperature on the structure and density of ammonium chloride particles 12 467

SUBMICROMETER
A new technique to measure number concentration of sub-micrometer particles: theory and experiment 16 477

SUBMICRON
A note comparing the rates of deposition of submicron particles with the rates of heat transfer for ribbed surfaces exposed to turbulent gas streams 17 145
An approximation of the bipolar charge distribution for particles in the submicron size range - TECHNICAL NOTE - 19 387
Collection of hydrophilic and hydrophobic charged submicron particles by charged water droplets 14 703
Determination of the retention efficiency of industrial air filters for particle sizes in the submicron range 17 931
Evaluation of aerosol deconvolution algorithms for determining submicron particle size distributions with diffusion battery and condensation nucleus counter 20 477
Measurements of the rate at which submicron aerosol particles are scavenged by water drops 16 399
Turbulent deposition of submicron particles on rough walls 16 81

SULFATE See Sulphate

SULPHATE
Analysis of various nucleation mechanisms for sulfate particles in the stratosphere 13 561
Measurement of the water cycle in a levitated ammonium sulfate particle 15 563
Response of a quartz crystal aerosol mass monitor of sulfate and nitrate aerosols 14 633
Growth of sulphate aerosols in the human airways 13 9

SULPHURIC ACID
Binary homogeneous nucleation theory by cluster-cluster interaction with application to the H_2SO_4-H_2O system 12 61
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere 12 517

SUPERSATURATION
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. Homogeneous nucleation of stearic acid 14 697
Diffusion tube; a cloud condensation nucleus counter for use below 0.3% supersaturation 13 297
Estimation of supersaturation attained in a condensation nucleus counter 15 553
Supersaturation and expansion ratios in condensation nuclei counters: an historical perspective 13 481
Temperature-supersaturation relation for natural sorption ice-forming nuclei 14 49

SURFACE
Application of a multistept condensation nuclei counter as a detector for particle surface composition 16 201
Deposition of sub-micrometer particles onto a heated surface with widely spaced roughness elements 20 671

Fast numerical procedure for determining the saddle point of a free energy surface 12 75
Greased and oiled substrates as bounce-free impaction surfaces 18 215
Ice crystal formation on aerosol particles with a non-uniform surface 13 21
On the kinetics of particle reentrainment from surfaces 20 483
Performance criteria and evaluation of surface scanners 20 457
Simple method for the calculation of turbulent deposition to smooth and rough surfaces 12 275
Studies on the dry deposition of aerosol particles on vegetation and plane surfaces 16 463
Surface and bulk chemical analysis on metal aerosol generated by manual metal arc welding of stainless steel 17 1

SUSPENSION
Redispersion of fly ash from a liquid nitrogen suspension 12 39

TANDEM
Application of the tandem differential mobility analyzer to studies of droplet growth or evaporation 17 771

TARGETS
The influence of the aerosol on the color and luminance differences of distant targets 18 99

TEMPERATURE
Effect of temperature on the structure and density of ammonium chloride particles 12 467
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere 12 517
Inertial impaction of fine particles at high temperature and high pressure 12 297
Temperature-supersaturation relation for natural sorption ice-forming nuclei 14 49

TERNARY
Rate of homogeneous nucleation in ternary systems 13 139

THEORETICAL
Theoretical equilibrium bipolar charge distributions of chain aggregates with uniform spheres 14 489

THERMAL
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. homogeneous nucleation of stearic acid 14 697
Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rates of vapour in a thermal diffusion cloud chamber 13 587
Thermal diffusion of aerosol particles: Lagrangian auto-correlation as an alternative to Langevin's equation 13 597

THERMODIFFUSIOPHORETIC
Experimental observations of particle size dependent, turbulent deposition in a tray dryer and of the directional change of thermodiffusiophoretic forces 15 573

THERMOPHORESIS
Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rates of vapour in a thermal diffusion cloud chamber 13 587
Particle coagulation, diffusion and thermophoresis in laminar tube flows 20 101
Thermo- and diffusiophoresis for small aerosol particles 12 1
Thermophoresis of aerosol particles at small Knudsen numbers: theory and experiment 13 327
Thermophoresis and diffusiophoresis of large aerosol particles of different shapes 15 511
Thermophoresis in an absorbing aerosol 18 245
Thermophoresis in boundary layer flows 20 1

THIN-WALLED
Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction **13** 59
Aspiration of coarse aerosol by a thin-walled sampler **17** 763
On the empirical fitting equations for aspiration coefficients for thin-walled sampling probes **20** 713
Recent advances in aspiration theory for thin-walled and blunt aerosol sampling probes **18** 487

THORIUM
Emanation of ^{232}U daughter products from submicrometer particles of uranium oxide and thorium dioxide by nuclear recoil and inert gas diffusion **14** 75
Radon daughter and thoron daughter deposition velocity and unattached fraction under laboratory-controlled conditions and in underground uranium mines **16** 157

TIME
Correction to the small-time approximation of diffusive deposition from a uniform initial concentration of particles in a circular tube with adsorbing walls **12** 15
Quantitative theory for time lag in nucleation **12** 105

TOTAL
Total and regional deposition of inhaled aerosols in humans **14** 599

TOURMALINE
Clearance of inhaled tourmaline rock dust from the rat lung **20** 639

TRACE (element)
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence **13** 321

TRACHEOBRONCHIAL
Measurement of particle dose distribution in a model of a human larynx and tracheobronchial tree **14** 11

TRAFFIC
Particle emission from gasoline powered vehicles: Emission, deposition and re-emission under different traffic density situations **17** 973

TRANSPORT
Transport of discrete particles in inhomogeneous turbulence **14** 729

TUBE
Correction to the small-time approximation of diffusive deposition from an uniform inital concentration of particles in a circular tube with adsorbing walls **12** 15
Deposition of aerosol particles in a straight tube with a abrupt obstruction **15** 167
Deposition of fibrous aerosol in model bifucating tubes **18** 337
Measurement of particulate and gaseous ammonia at a suburban area by means of diffusion tubes (denuders) **15** 465
Penetration measurements for tube and screen-type diffusion batteries in the ultrafine particle size range **15** 673
Quantitative evaluation of aerosol deposition in constricted tubes **16** 167

TURBULENCE
Transport of discrete particles in inhomogeneous turbulence **14** 729

TURBULENT
A model for turbulent deposition of aerosols **19** 123
Experimental study of the effect of turbulent diffusion on precipitator efficiency **13** 271

Experimental observations of particle size dependent, turbulent deposition in a tray dryer and of the directional change of thermodiffusiophoretic forces **15** 573
Etude expérimentale de l'agglomeration turbulente induite par un champ acoustique **19** 3
Influence of particle inertia on aerosol deposition in a stirred turbulent flow field **20** 419
Measurement of the deposition of small particles in stationary and oscillating turbulent pipe flow **14** 615
On turbulent deposition of particles to rough surfaces **17** 903
Simple method for the calculation of turbulent deposition to smooth and rough surfaces **12** 275
Turbulent deposition and gravitational sedimentation of an aerosol in a vessel of arbitrary shape **12** 405
Turbulent deposition of submicron particles on rough walls **16** 81
Turbulent eddy deposition of particles on smooth and rough surfaces **20** 431

ULTRAFINE
Charge distribution of ultrafine aerosols undergoing bipolar charging **13** 127
Dispositif de grossissement de particules ultrafines **19** 11
Evaluation of coarse screens as diffusion cell material for ultrafine aerosols below 0.02μm **19** 733
Measurement of ultrafine aerosol particle size distributions at low concentrations by parallel arrays of a diffusion battery and a condensation nucleus counter in series **20** 471
Particle size analysis of log-normally distributed ultrafine particles using a differential mobility analyser **20** 547
Penetration measurements for tube and screen-type diffusion batteries in the ultrafine particle size range **15** 673
Remarks on particle size distributions of ultrafine binary particles with one involatile component **16** 273

ULTRASONIC
Drug degeneration during ultrasonic nebulization **16** 265
Generation and characterization of aerosols of dispersed surface active phospholipids by ultrasonic and jet nebulization **14** 683

ULTRAVIOLET
Nuclei production in Alaska air masses under the action of short wave (1850 Å) ultraviolet irradiation **14** 475

UNIFORM
Correction to the small-time approximation of diffusive deposition from an uniform initial concentration of particles in a circular tube with adsorbing walls **12** 15
Theoretical equilibrium bipolar charge distributions of chain aggregates with uniform spheres **14** 489
Uniform deposit impactor **12** 333

UNIPOLAR
Experimental measurement of the rate of unipolar charging of actinolite fibers **18** 73
General field charging theory for aerosol particle charging and neutralizing in unipolar and bipolar ion fields **14** 127
Theory of diffusion charging of arbitrarily shaped conductive aerosol particles by unipolar ions **12** 19
Unipolar charging of ultrafine aerosols **17** 117
Unipolar a.c. field charging - Technical Note - **20** 619

UNIVERSITY
Modification of the University of Washington Mark 5 in-stack impactor **20** 813

URANIUM
Emanation of ^{233}U daughter products from submicrometer particles of uranium oxide and thorium dioxide by nuclear recoil and inert gas diffusion **14** 75
Radon daughter and thoron daughter deposition velocity and unattached fraction under laboratory-controlled conditions and in underground uranium mines **16** 157

VAPOURS
A soluble one-dimensional problem for coupled heat conduction and mass diffusion with aerosol formation in a vapour-gas mixture **17** 129
Condensation of supersaturated vapours in the downward and upward thermal diffusion cloud chamber. Homogeneous nucleation of stearic acid **14** 697

Influence of thermophoresis and diffusiophoresis on the measurement of homogeneous nucleation rates of vapour in a thermal diffusion cloud chamber 13 587
On the influence of the vapour substance on the behaviour of an expansion-type condensation nucleus counter 16 457

VELOCITY
Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction 13 59
Determination of deposition velocity onto a wafer for particles in the size range between 0.03 and 0.8 μm 20 787
Problems in the measurement of thermophoretic velocities of aerosol particles 19 167
Radon daughter and thoron daughter deposition velocity and unattached fraction under laboratory-controlled conditions and in underground uranium mines 16 157

VESSEL
Turbulent deposition and gravitational sedimentation of an aerosol in a vessel of arbitrary shape 12 405

VIBRATING
Continuous dispersion of aqueous solutions by a modified vibrating orifice aerosol generator 16 261

VISCOUS
Diffusion from a viscous stream flowing through a rectangular channel 14 741
Measurements of viscous drag on cylinders and chains of spheres with aspect ratios between 2 and 50 16 535
Viscous flow into a membrane filter composed of randomly situated pores 14 481

VOAG
Improvements to the vibrating orifice aerosol generator 18 231

VOLATILE
Evaporation and growth of droplets having more than one volatile constituent 12 505

WAFERS
Determination of deposition velocity onto a wafer for particles in the size range between 0.03 and 0.8 μm 20 787
Particle deposition on wafers: A comparison between two modeling approaches 20 683

WAKE
Determination of aerosol deposition on the front and wake side of spheres by gas-chromatography 18 147
Particle deposition in the wake of charged spheres 13 491

WALLS
Correction to the small-time approximation of diffusive deposition from an uniform inital concentration of particles in a circular tube with adsorbing walls 12 15
Wall correction to the Stokes resistance of arbitrarily shaped particles 18 457

WATER
Binary homogeneous nucleation theory by cluster-cluster interaction with application to the H_2SO_4-H_2O system 12 61
Collection of hydrophilic and hydrophobic charged sub-micron particles by charged water droplets 14 703
Effects of temperature and humidity on the growth and optical properties of sulphuric acid-water droplets in the stratosphere 12 517
Kinetics of ice nucleation on aerosol particles in supercooled fog - I. The influence of water vapour depletion 18 261

Measurements of the rate at which submicron aerosol particles are scavenged by water drops 16 399
Radiation fog liquid water acidity at a field station in the Po Valley 14 135
Size and activity distributions of aerosols in the turbine building of a boiling-water-reactor plant 16 437

WHITBY MEMORIAL AWARD
The Kenneth T. Whitby memorial award, 16 491

WIND
Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction 13 59
Wind effects on personal dust samplers 18 159

WIND-BORNE
Sampling efficiency of aerosol samplers for large windborne particles - a preliminary report 14 65

WORKSHOP REPORTS
European aerosol conference, September 1988, Lund, Sweden "Selective" drug deposition in the respiratory tract, 20 723
Industrial applications of aerosol technology 20 725
High temperature aerosols 20 725
Paint finishing application 20 726
Preparation and application of monodisperse polymer particles 20 727
Isokinetic emission sampling probe 20 728
Aerosol production control 20 729
Combustion control by aerosol photoemission 20 731
Removal of fine particles from gases with bag filters 20 731

X-RAY
Experimental improvements in analysis of aerosol samples by X-ray powder diffraction 16 373
Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence 13 321

ABSTRACTS OF THE ANNUAL CONFERENCE OF THE GESELLSCHAFT FÜR AEROSOLFORSCHUNG (Düsseldorf 1979, Schmallenberg 1980, Duisburg 1981, Bologna 1982, Munich 1983, Garmisch-Partenkirchen 1985, Hannover 1987, Lund 1988 and Vienna 1989)

BOOK REVIEWS - TITLE OF BOOKS

Aerosol and the Lung: Clinical and Experimental Aspects 16 189
Aerosol Charge Distributions Produced by RadioactiveIonizers, 20 625
Aerosol Measurement, 11 225
Aerosol Sampling - Science and Practice, 20 733
Aerosol Science for Engineers, 11 332
Aerosol Technology, 14 175
Aerosols - An Industrial and Environmental Science,16 489
Air Pollution and Forests, 15 187
Air Pollution and Effects on Humans, Register of Effects, 16 87
Air Sampling Instruments for Evaluation of Atmospheric Contaminants, 11 111
Atmospheric Motion and Air Pollution, 11 592
Atomisation and Sprays, 20 843

Cascade Impactor - Sampling and Data Analysis Chlorofluorocarbons in the Environment, 12 291
Cascade Impactor - Sampling and Data Analysis 18 349

Deposition and Effects of Inhalation Aerosols 15 643

Electrification of Coarsly-Disperse Aerosols in the Atmosphere, 14 577
Electromagnetic Scattering and Its Applications, 13 269
Emissions of Sulphur into the Atmosphere, 14 175

Fast Breeder Reactors, 13 89

Gas Transport in Porous Media: The Dusty-Gas Model,15 81
Generation of Aerosols and Facilities for Exposure Experiments, 12 151

Handbook on the Toxicology of Metals, 13 469

I Class 85. Proceedings of the Third International Conference on Liquid Atomisation and Spray Systems,17 757
Industrial Separators for Gas Cleaning, 11 226
Industry and the Environment in Perspective 16 190
Inhaled Particles V, 14 575
Introduction to Aerosol Science, 16 363

Lung Modelling for Inhalation of Radioactive Materials, 16 577

Measurements of Atmospheric Aerosols: Experimental Methods and Results of Measurements Off the East Coast of the United States, 16 189

Nitrogen Oxides and Their Effect on Health, 11 592
Novel Concepts, Methods and Advanced Technology in Particulate-Gas Separation, 11 331
Nuclear Aerosol Science. Nuclear Technology, 20 396

Organofluorine Chemicals and Their Industrial Applications,11 331

Particulate Phenomena and Multiphase Transport, 20 499
Particulate Science and Technology, 13 359
Physical and Chemical Characterization of Individual Airborne Particles 17 886
Physical Phenomena in Ultradisperse Media, 16 364
Physico-chemical Behaviours of Atmospheric Pollutants,13 469
Polluted Rain, 12 151
Proceedings of the CSNI Specialist Meeting on Nuclear Aerosols in Reactor Safety, 16 577

Radarmétéorologie - Télédétection active de l'Atmosphère, 14 175

JOURNAL OF AEROSOL SCIENCE

In association with the Gesellschaft für Aerosolforschung (GAeF)
Association for Aerosol Research

Notes for Contributors

1. Papers should be submitted to either of the Editors-in-Chief or to a Member of the Editorial Board. Those considered to be consistent with the aims and scope of the *Journal of Aerosol Science* will be peer-reviewed by at least two independent referees.
2. The following types of manuscripts are acceptable for submission:
   —full-length papers
   —technical notes
   —comments on previously-published articles, including reply
   —camera-ready short communications (for particularly timely subjects only).
3. Manuscript format for type-set articles:
   —submit three copies, typed double-spaced on A4 or $8\frac{1}{2}'' \times 11''$.
   —front page should contain title, authors' addresses and affiliations, corresponding author, and running title of up to 40 characters
   —abstract of up to 150 words
   —layout of the text should be consistent with the style of the Journal (see this and previous issues)
   —illustrations should not be inserted into the text but should accompany the manuscript on separate sheets. Originals should not contain any captions, only figure numbers and authors' names lightly pencilled on the back. Captions should be typed on separate sheets. Black and white line drawings should be used whenever possible, either in indian ink with photoreproductive quality lettering or from a good quality laser printer (or equivalent). Dot matrix printers usually give unsatisfactory results. Half-tones in black and white are acceptable, but should be kept to a minimum. Note that all original artwork will be destroyed one month after publication, unless the corresponding author specifically requests its return.
4. Format for camera-ready short communications:
   —number of camera-ready pages may not exceed four
   —to expedite, it is suggested that the original submission should be in the form of a regular typed manuscript, with submission of the camera-ready version only after acceptance
   —camera-ready copy must be typed on laysheets which may be obtained from the Editors-in-Chief, together with detailed instructions [see also information at the back of *J. Aerosol Sci.* (1987), Vol. 18, No. 2].
5. References to literature in the text should be quoted in the form Jones (1950), or Jones *et al.* (1950) if there are three or more authors. The list of references should be given at the end of the text in alphabetical order (authors' surnames first). The title of the journal should be abbreviated as in the World List of Scientific Periodicals (4th Edition). Some examples are:

   Davies, C. N. (1970) *J. Aerosol Sci.* **1**, 35.
   or optionally (but consistently)
   Davies, C. N. (1970) The clogging of fibrous aerosol filters. *J. Aerosol Sci.* **1**, 35.
   Frisby, C. B. (1954) Industrial Medicine and Hygiene (Edited by Merewether, A.), Vol. II, p. 16. Butterworths, London.
   Fuchs, N. A. (1964) *The Mechanics of Aerosols*. Pergamon Press, Oxford.
   American Inst. of Physics Handbook (1972) 3rd Edition. McGraw-Hill, New York.
6. The use of SI units throughout is recommended; other metric units may be used at the discretion of the Editors-in-Chief. Non-metric units may be used only exceptionally (e.g. where they have become internationally-accepted industrial conventions); in such cases, however, the equivalent SI units must be provided in parentheses or, in the case of graphs, by the use of a second axis.
7. Unless otherwise specified, proofs will be sent to the corresponding author for correction, and he/she should ensure that changes are restricted to printer's errors: any other substantial corrections will be charged to the author(s).

Publishing and Advertising Offices: Headington Hill Hall, Oxford OX3 0BW, U.K.

Annual subscription rate (1991, *including postage and insurance*): Annual institutional subscription rate (1991) DM 935.00. 2 year institutional rate (1991/92) DM 1776.50. Personal subscription rate for those whose library subscribes at the regular rate available on request from Pergamon Press offices. Subscription rates for Japan include despatch by air and prices are available on application. Prices are subject to change without notice. Subscription enquiries from customers in North America should be sent to Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A. and for the remainder of the world to Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, U.K. 8 Issues/annum (7 regular issues and 1 supplement issue). Members of GAeF receive the journal as part of their membership dues. Details on membership of the Association can be obtained from: Dr W. Holländer; Tel. (0511) 5350118, Fax. (0511) 5350155.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appear in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Copyright © 1991 Pergamon Press plc

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A. The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970.

Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the Publisher for such copying.

The Item-fee Code for this publication is: 0021–8502/91 $3.00 + 0.00.

Microform Subscriptions and Back Issues. Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon offices.
